Fair Resource Allocation And Rationing At The Bedside:

Fair Resource Allocation and Rationing at the Bedside Marion Danis, Samia A. Hurst, Len Fleck, Reidun Forde, Anne Slowther, 2014-10-02 Health systems need to set priorities fairly In one way or another part of this important task will fall to physicians How do they make judgments about resource stewardship and how should they do so How can they make such decisions in a manner that is compatible with their clinical duties to patients In this book philosophers bioethicists physicians lawyers and health policy experts make the case that priority setting and rationing contribute significantly to the possibility of affordable and fair healthcare and that clinicians play an indispensable role in that process The book depicts the results of a survey of European physicians about their experiences with rationing and other cost containment strategies and their perception of scarcity and fairness in their health care systems Responding to and complementing these findings commentators discuss why resource allocation and bedside rationing is necessary and justifiable The book explores how bedside rationing relates to clinical judgments about medical necessity and medical indications marginal benefits weak evidence based medicine off label use The book highlights how comparative studies of health care systems can advance more effective and fair bedside rationing through learning from one another From a practical standpoint the book offers a number of strategies for health care systems and clinicians to work in tandem to allocate and ration resources as fairly as possible how to foster more attention to fairness when rationing at the bedside how to avoid exacerbating health disparities when allocating resources how to teach about bedside rationing to students how to discuss rationing more explicitly in the public arena and in the doctor s office

Prioritization in Medicine Eckhard Nagel, Michael Lauerer, 2015-10-30 The gap between a rising demand for health care services on the one side and scarce resources on the other is leading to a growing pressure on decision making processes Hence prioritization in medicine has become an increasingly important issue for assuring stability of health systems and improving the capability of health care The present volume addresses normative dimensions of methodological and theoretical approaches the legal basis behind priority setting as well as international experiences concerning the normative framework and the process of priority setting It also examines specific criteria for prioritization and discusses economic evaluations Contributing authors from a broad range of scientific disciplines discuss prioritization within an international dialogue

Rationing and Resource Allocation in Healthcare Ezekiel Emanuel, Harald Schmidt, Andrew Steinmetz, 2018-05-10 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation **Rationing and Resource Allocation in Healthcare Essential Readings** provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics

Financing Micro Health Insurance: Theory, Methods And Evidence David M Dror, 2018-12-27 Healthcare for all at affordable prices is still a major but universally elusive goal Everyone spends money on healthcare and it is the most impoverishing consumption item Thus most governments and the United Nations promote Universal Health Coverage each country's unique blend of tools for healthcare financing including taxes subsidies and market controls Most people in low and middle income countries LMICs have no health insurance of any kind And most LMIC governments lack the political will information or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price This book deals with financing voluntary and contributory health insurance for resource poor and rural groups in LMICs This book addresses three issues The first is how to catalyse demand for health insurance and develop insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes The second involves the process of developing simplified methods for risk assessment which can help to underwrite risks price the micro health insurance schemes and ensure proper implementation The third issue is formulating a compelling business case which would make this health insurance affordable financially sustainable and operationally scalable This book develops insurance education and financial literacy for students of economics business administration insurance development studies and social

Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive Yet in response to the global financial crisis of the last few years healthcare funding is slowing or decreasing throughout the world How we manage health care resources in the intensive care unit ICU now and in a future that promises only greater cost constraints is the subject of this book the third in an informal series of volumes providing a global perspective on difficult issues arising in the ICU Taking 12 developed countries as their focus leading experts provide a country by country analysis of current ICU resource allocation A second group of experts use the chapters as a departure point to analyze

current ICU resource allocation at the level of the global medical village The process is repeated but with an eye toward the future first country by country then at the global level that takes into account initiatives and reforms now underway A fictional healthcare plan the Fair Equitable Healthcare Plan is put forth to address weaknesses in existing approaches and healthcare experts and ethicists are invited to respond to its often provocative provisions Itself structured as a dialogue the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead The Hastings Center Guidelines for Decisions on Life-Sustaining Treatment and Care Near the End of Life Nancy Berlinger, Bruce Jennings, Susan M. Wolf, 2013-04-26 This major new work updates and significantly expands The Hastings Center's 1987 Guidelines on the Termination of Life Sustaining Treatment and Care of the Dying Like its predecessor this second edition will shape the ethical and legal framework for decision making on treatment and end of life care in the United States This groundbreaking work incorporates 25 years of research and innovation in clinical care law and policy It is written for physicians nurses and other health care professionals and is structured for easy reference in difficult clinical situations It supports the work of clinical ethicists ethics committee members health lawyers clinical educators scholars and policymakers It includes extensive practical recommendations Health care reform places a new set of challenges on decision making and care near the end of life The Hastings Center Guidelines are an essential resource

Bioethics Reenvisioned Nancy M. P. King, Gail E. Henderson, Larry R. Churchill, 2022-11-29 Bioethics needs an expanded moral vision Born in the ferment of the 1970s the field responded to rapid developments in biomedical technology and injustices in clinical care and research Since then bioethics has predominantly focused on respect for autonomy beneficence and nonmaleficence and the zero sum lifeboat ethics of distributive justice applying these principles almost exclusively within the walls of medical institutions It is now time for bioethics to take full account of the problems of health disparities and structural injustice that are made newly urgent by the COVID 19 pandemic and the effects of climate change This book shows why and how the field must embrace a broader and more meaningful view of justice principally by incorporating the tools and insights of the social sciences epidemiology and public health Nancy M P King Gail E Henderson and Larry R Churchill make the case for a more social understanding and application of justice a deeper humility in assessing expertise in bioethics consulting a broader and more relevant research agenda and greater appreciation of the profound health implications of global warming The Hackett Introduction to Medical Ethics Matthew Altman, Cynthia Coe, 2025-08-18 The Hackett Introduction to Medical Ethics addresses key debates and analyzes prominent ethical perspectives on clinical medicine healthcare policy and human experimentation Using numerous examples and case studies Altman and Coe apply value theory to contemporary medical practice and trace the repercussions for such philosophical issues as autonomy death and justice The book invites a range of readers to investigate urgent moral questions at the intersection of the body and social institutions Free online resources to support The Hackett Introduction to Medical Ethics will be available on the book title

page at www.hackettpublishing.com in early fall 2025 Resources will include PowerPoint lecture slides a sample syllabus links to case studies to help facilitate small group discussion and apply theoretical concepts and more

Rehabilitation Ethics for Interprofessional Practice Laura L. Swisher, Charlotte Brasic Royeen, 2019-02-26 Rehabilitation professionals need to be grounded in moral principles in order to meet the needs of patients and effectively collaborate in interprofessional healthcare teams Rehabilitation Ethics for Interprofessional Practice introduces a common language and theory for interdisciplinary ethics education and practice while establishing a moral foundation and guiding readers in how to put ethical principles into action The text begins by describing the moral commons a framework for ethical deliberation characterized by mutual respect for personal and professional identity common language inclusion of relevant stakeholders and the dialogic process The authors then describe the Dialogic Engagement Model DEM gives professionals a structure and space for learning and understanding within their teams as they strive to provide ethical patient care Rehabilitation Ethics for Interprofessional Practice is forward looking grounded in both theory and practice A resource for faculty

Intensive Care Medicine in 10 Years Mitchell P. Fink, Peter M. Suter, William J. Sibbald, 2006-10-25 This book identifies trends in critical care medicine that will form the basis for practice over the next ten years Predicting the future is always risky Nevertheless the ideas articulated in this book are likely to serve as a road map for intensivists hospital administrators and governmental leaders interested in healthcare as they seek to improve the quality and efficiency of hospital based services

Clinical Ethics Consultation John-Stewart Gordon, 2016-05-23 This volume brings together researchers from different European countries and disciplines who are involved in Clinical Ethics Consultation CEC The work provides an analysis of the theories and methods underlying CEC as well a discussion of practical issues regarding the implementation and evaluation of CEC The first section deals with different possible approaches in CEC The authors explore the question of how we should decide complex cases in clinical ethics that is which ethical theory approach or method is most suitable in order to make an informed ethical decision It also discusses whether clinical ethicists should be ethicists by education or rather well trained facilitators with some ethical knowledge The second chapter of this book focuses on practical aspects of the implementation of CEC structures The analysis of experienced clinical ethicists refers to macro and micro levels in both developed and transitional countries Research on the evaluation of CEC is at the centre of the final chapter of this volume In this context conceptual as well as empirical challenges with respect to a sound approach to judgements about the quality of the work of CECs are described and suggestion for further research in this area are made In summary this volumes brings together theorists and healthcare practitioners with expertise in CEC In this respect the volume serves as good example for a multi and interdisciplinary approach to clinical ethics which combines philosophical reasoning and empirical research

Encyclopedia of Medical Decision Making Michael W. Kattan, 2009-08-15 Decision making is a critical element in the field of medicine that can lead to life or death outcomes yet it is an element fraught with complex and conflicting variables

diagnostic and therapeutic uncertainties patient preferences and values and costs Together decisions made by physicians patients insurers and policymakers determine the quality of health care quality that depends inherently on counterbalancing risks and benefits and competing objectives such as maximizing life expectancy versus optimizing quality of life or quality of care versus economic realities Broadly speaking concepts in medical decision making MDM may be divided into two major categories prescriptive and descriptive Work in the area of prescriptive MDM investigates how medical decisions should be done using complicated analyses and algorithms to determine cost effectiveness measures prediction methods and so on In contrast descriptive MDM studies how decisions actually are made involving human judgment biases social influences patient factors and so on The Encyclopedia of Medical Decision Making gives a gentle introduction to both categories revealing how medical and healthcare decisions are actually made and constrained and how physician healthcare management and patient decision making can be improved to optimize health outcomes Key Features Discusses very general issues that span many aspects of MDM including bioethics health policy and economics disaster simulation modeling medical informatics the psychology of decision making shared and team medical decision making social moral and religious factors end of life decision making assessing patient preference and patient adherence and more Incorporates both quantity and quality of life in optimizing a medical decision Considers characteristics of the decisionmaker and how those characteristics influence their decisions Presents outcome measures to judge the quality or impact of a medical decision Examines some of the more commonly encountered biostatistical methods used in prescriptive decision making Provides utility assessment techniques that facilitate quantitative medical decision making Addresses the many different assumption perspectives the decision maker might choose from when trying to optimize a decision Offers mechanisms for defining MDM algorithms With comprehensive and authoritative coverage by experts in the fields of medicine decision science and cognitive psychology and healthcare management this two volume Encyclopedia is a must have resource for any academic library
