Strengthening Rural Livelihoods David J. Grimshaw, Shalini Kala, 2011 Enthusiasm amongst international development agencies about harnessing the potential of information and communications technologies ICTs for development has generated questioning

of the impact and sustainability of such interventions By presenting the findings of research specifically designed to measure impact on livelihoods **Strengthening Rural Livelihoods** offers new evidence for the development benefits of ICTs The book asks if ICTs enabled farmers to sell beyond local markets and at better prices and whether there have been social gains in linking geographically disparate households and social networks The authors have provided significant new insights into how to overcome the challenges of mainstreaming ICTs into rural livelihoods and more effectively measuring its effects This book will appeal to academics civil society organizations practitioners and students who are interested in what works and what doesn't work when applying ICTs to rural livelihoods
