Preventative Approach for Psychosocial Well-being in Childhood Murli Desai, 2010-09-02 Children are one of the most important phases of human development and the most important target group for social work intervention. Most of the schools of human development and social work around the world have an elective course on children and some offer a concentration in this area. There are plenty of textbooks on intervention with children published by Western authors focusing on useful theories and skills but mainly at the remedial level. They neither use the preventative approach nor the child rights perspective which has been found useful in the developing nations. The books on child rights are generally published by the United Nations Children's Fund UNICEF and other international organisations working in the field of children such as Save the Children. These books focus on the useful child rights perspective but they neither integrate theories nor use the preventative approach. The proposed book, **A Rights based Preventative Approach for Children's Psychosocial Well Being**, will be the first to apply the child rights perspective and the preventative approach to intervention for children's psychosocial well being. It is an integration of theories with practice and teaching relevant in different parts of the world. The book is divided into the following three parts: Part 1 Introduction to a Rights based Preventative Approach for Children's Psychosocial Well Being; Part 2 Primary Prevention for Children's Psychosocial Well Being; Part 3 Secondary and Tertiary Prevention for Children's Psychosocial Well Being. **Rights-based Integrated Child Protection Service Delivery Systems** Murli Desai, 2019-09-17 The Sourcebook IV provides training modules for rights based integrated child protection service delivery systems at the secondary and tertiary prevention levels. Part 1 of the Sourcebook focuses on the preventative, comprehensive, integrated and systemic and universal community based and family based service delivery systems for children and the

methods of case management and outcomes based project cycle Part 2 discusses children and families at risk and the role of community based Integrated Childcare and Support Centres for providing supplementary care and support services to them at the secondary prevention level It also focuses on children facing sociolegal problems such as deprivation of parental care violence and conflict with law and the role of District based Integrated Child Protection Centres for providing protection justice and rehabilitation to them at the tertiary prevention level Part 3 focuses on children in emergencies in general and in specific situations and role of Integrated Child Protection Centres in these situations This is a necessary read for social workers lawyers researchers trainers and teachers working on child rights across the world and especially in developing countries
