Discourse Perspective of Geometric Thoughts Sasha Wang, 2016-03-22 Sasha Wang revisits the van Hiele model of geometric thinking with Sfard's discursive framework to investigate geometric thinking from a discourse perspective. The author focuses on describing and analyzing pre-service teachers' geometric discourse across different van Hiele levels. The explanatory power of Sfard's framework provides a rich description of how pre-service teachers think in the context of quadrilaterals. It also contributes to our understanding of human thinking that is illustrated through the analysis of geometric discourse accompanied by vignettes.

REA's Practical Help for Pre-algebra Sally H. Spetz, Staff of Research Education Association, 2002-01-01 This book is useful for those who need help in solving day-to-day problems that require arithmetic operations such as fractions, percentages, formulas, and tables. The material is presented in an especially straightforward, simple manner. The book is intended for middle and high school students, candidates for standardized tests, adult education students, and anyone who would welcome assistance in dealing with practical problems that occur in every day living. A large number of practice exercises and tests are included for those who wish to use the book for classroom courses and tests. The book is also highly suitable as a self-teaching guide.

Intelligent Tutoring Systems Barry P. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems (ITS) was held ten years ago in Montreal. ITS 88 was so well received by the international community that the organizers decided to do it again in Montreal four

years later in 1992 and then again in 1996 ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it's only been two years not four since the last one. One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization e.g. IEEE or AACE. Rather the founder of these conferences, Claude Frasson, started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues. Thus the unifying theme is science. This year's hot topics differ from those in the earlier ITS conferences as they reflect ever-changing trends in ITS research. A few of the issues being examined at ITS 98 include Web-based tutoring systems, deploying ITS in the real world, tutoring and authoring tools, architectures and knowledge structure and representation. , **Math Connection™, Grade 6** ,2012-09-01

Kotsopoulos, Adam K. Dubé, 2023-06-15. This book focusses on teaching and learning in elementary and middle school mathematics and suggests practices for teachers to help children be successful mathematical thinkers. Contributions from diverse theoretical and disciplinary perspectives are explored. Topics include the roles of technology, language and classroom discussion in mathematics learning, the use of creativity, visuals and teachers' physical gestures to enhance problem solving, inclusive educational activities to promote children's mathematics understanding, how learning in the home can enhance children's mathematical skills, the application of mathematics learning theories in designing effective teaching tools, and a discussion of how students, teachers, teacher educators and school boards differentially approach elementary and middle school mathematics. This book and its companion *Mathematical Cognition and Understanding* take an interdisciplinary perspective to mathematical learning and development in the elementary and middle school years. The authors' and perspectives in this book draw from education, neuroscience, developmental psychology and cognitive psychology. The book will be relevant to scholars, educators in the field of mathematics education and also those in childhood development and cognition. Each chapter also includes practical tips and implications for parents as well as for educators and researchers.
