Sino-Indian and Sino-South Korean Relations P. R. Chari,Vyjayanti Raghavan,2015-08-12 This book addresses the compulsions that underlie the China's relations with India and South Korea both increasingly mutually dependent on China for markets trade investments technology tourism etc It inquires into two sets of regional relationships with China being the common linking factor While examining the generational change in the leadership of China India and South Korea this study will be a significant addition to the evolving sphere of comparative regional relations Energy Security in Asia and Eurasia

Mike M. Mochizuki,Deepa M. Ollapally,2016-12-01 Many states appear to have strong sentiment on energy security and energy transit vulnerability Some analysts see the rapidly increasing demand for energy and competition for energy resources leading to nationalistic energy policies Others argue that global trends with efficient energy markets and growing options on renewables suggest more relaxed energy outlooks This book focuses on Asia where global demand for energy is now concentrated in the aspiring and rising powers of the region China India Japan and South Korea and also recognises the importance of Russia as a growing energy supplier Contributions by experts in the field provide detailed and parallel case studies Shedding light on the ongoing debate in the literature regarding energy outlooks of major Asian states they analyse whether energy policies are expected to evolve along market oriented cooperative lines or more competitive and even destructive mercantile nationalist lines The book argues that states are not unitary actors even in the key energy security arena and there are competing and contrasting viewpoints in Asian states on energy security It suggests that domestic debates structure thinking on energy security making energy policy more contingent than assumed by purely market or geopolitical logics Providing a strong contribution to comparative energy security studies the book fills an important gap in the literature on energy and national security and offers a basis for conducting further inter state interactive analysis It will be of interest to researchers on Asian Studies energy politics and international relations *Wars of Ignorance* Robert

Schub,Assistant Professor of Political Science Robert Schub,2025-10-03 Wars of Ignorance explains the dangerous pattern of leaders feeling certain they know how war will unfold despite the inherent uncertainties of warfare A leader's misplaced certainty originates in stunted advisory processes leaders consistently silence advisers from the bureaucracy that conducts diplomacy Crucially these advisers are the ones best equipped to judge whether the enemy's political landscape makes war a promising or doomed endeavor Diplomats thus foster peace not because they are doves but because they have unique information that leaders need to accurately gauge the international crises they confront Absent this information leaders risk blundering into war **China and the Developing World** Joshua Eisemann,Eric Heginbotham,Derek Mitchell,2015-08-20 China's relationship with the developing world is a fundamental part of its larger foreign policy strategy Sweeping changes both within and outside of China and the transformation of geopolitics since the end of the cold war have prompted Beijing to reevaluate its strategies and objectives in regard to emerging nations Featuring contributions by recognized experts this is

the first full length treatment of China's relationship with the developing world in nearly two decades Section one provides a general overview and framework of analysis for this important aspect of Chinese policy The chapters in the second part of the book systematically examine China's relationships with Africa the Middle East Central Asia Latin America South Asia and Southeast Asia The book concludes with a look into the future of Chinese foreign policy *China and Africa* David H. Shinn, Joshua Eisenman, 2012-07-10 The People's Republic of China once limited its involvement in African affairs to building an occasional railroad or port supporting African liberation movements and loudly proclaiming socialist solidarity with the downtrodden of the continent Now Chinese diplomats and Chinese companies both state owned and private along with an influx of Chinese workers have spread throughout Africa This shift is one of the most important geopolitical phenomena of our time China and Africa A Century of Engagement presents a comprehensive view of the relationship between this powerful Asian nation and the countries of Africa This book the first of its kind to be published since the 1970s examines all facets of China's relationship with each of the fifty four African nations It reviews the history of China's relations with the continent looking back past the establishment of the People's Republic of China in 1949 It looks at a broad range of areas that define this relationship politics trade investment foreign aid military security and culture providing a significant historical backdrop for each David H Shinn and Joshua Eisenman's study combines careful observation meticulous data analysis and detailed understanding gained through diplomatic experience and extensive travel in China and Africa China and Africa demonstrates that while China's connection to Africa is different from that of Western nations it is no less complex Africans and Chinese are still developing their perceptions of each other and these changing views have both positive and negative dimensions Not Just Another Cold War Bård Nikolas Vik Steen, 2025-03-05 Not Just Another Cold War considers how the emerging superpower rivalry between the US and China compares to the Cold War and what that means for the future of global politics By contrasting the current US China rivalry with a well understood conflict the authors provide insights into the characteristics and trajectory of the twenty first century's defining conflict With contributions from some of the world's most influential international relations scholars Stephen Walt M Taylor Fravel Odd Arne Westad Robert Ross and Thomas J Christensen among others the volume examines many of the most important facets of the US China relationship the economic and military balance the impact of technology geopolitical consequences relations between China and Russia the future of NATO and the risk of war over Taiwan Through their analysis the authors highlight key similarities between the current rivalry and the Cold War conflict but also vitally important differences The US China relationship the defining superpower rivalry of the twenty first century is likely to prove at least as dangerous and consequential as the contest that shaped the second half of the twentieth century But to understand and strategize around the current political face off it is essential to recognize that this is not just another Cold War **The U.S. Army in Asia, 2030-2040** Terrence K. Kelly, James Dobbins, David A. Shlapak, David C. Gompert, Eric Heginbotham, Peter Chalk, Lloyd Thrall, 2014-08-22 Looking to the 2030

2040 time frame U S policy and military strategy will need to strike a balance among maintaining a cooperative relationship with China deterring Chinese aggression in regional disputes and preparing for the possibility that China could become more assertive The U S Army will have an important role to play in preparing for these developments and for protecting and furthering U S interests in the region

How to Think about Information Dan Schiller, 2024-04-22 It is common wisdom that the U S economy has adapted to losses in its manufacturing base because of the booming information sector with high paying jobs for everything from wireless networks to video games We are told we live in the Information Age in which communications networks and media and information services drive the larger economy While the Information Age may have looked sunny in the beginning as it has developed it looks increasingly ominous its economy and benefits grow more and more centralized and in the United States it has become less and less subject to democratic oversight Corporations around the world have identified the value of information and are now seeking to control its production transmission and consumption In *How to Think about Information* Dan Schiller explores the ways information has been increasingly commodified as a result and how it both resembles and differs from other commodities Through a linked series of theoretical historical and contemporary studies Schiller reveals this commodification as both dynamic and expansionary but also deeply conflicted and uncertain He examines the transformative political and economic changes occurring throughout the informational realm and analyzes key dimensions of the process including the buildup of new technological platforms the growth of a transnationalizing culture industry and the role played by China as it reinserts itself into an informationalized capitalism *Challenges and Policy Programmes of China's New Leadership* Joseph Y. S. CHENG, 2007-04-01 This volume analyzes the new leadership's perceptions of the

regional role which has been interpreted through the prism of the Sino Indian relationship in the inception and evolution of the policy More specifically it establishes the extent to which China has been raised as a priority in discourses of India s Look East Policy and how this has varied over time from the origins of the policy through to the most recent phase of the renamed Act East Policy Addressing the distinction between what policymakers signal in their official statements and their true or underlying motivations the book alludes to the fact that government officials may not always reflect true intentions in their official statements and it is often what is not said that may reveal more about their real motivations This is particularly relevant in the context of the Sino Indian relationship where diplomatic rhetoric often masks more competitive and confrontational aspects of the bilateral relationship An important analysis of the interplay between India s relations with Southeast Asia and China this book will be of interest to academics policymakers and students in the fields of International Relations Asian Security Southeast Asian politics and in particular Indian foreign policy the Sino Indian relationship and India s Look East Act East Policy
