Georges Canguilhem Philosophe Historien Des Sciences:

Georges Canguilhem philosophe historien des sciences Collectif, 2012-11-05 M decin philosophe successeur de Gaston Bachelard la t te de l Institut d histoire des sciences et techniques de l universit de Paris Georges Canguilhem est l un des fondateurs de la tradition pist mologique fran aise Penseur la post rit d j nombreuse il a tir de ses tudes m dicales la mati re d une interrogation profonde sur les sciences du vivant qui s av re d une extraordinaire actualit Ce livre fruit d un colloque international s emploie pour la premi re fois d ployer dans toutes ses dimensions scientifique philosophique thique et politique la complexit de l oeuvre de Canguilhem *Continental Philosophy of Science* Gary Gutting, 2008-04-15 Continental Philosophy of Science provides an expert guide to the major twentieth century French and German philosophical thinking on science A comprehensive introduction by the editor provides a unified interpretative survey of continental work on philosophy of science Interpretative essays are complemented by key primary source selections Includes previously untranslated texts by Bergson Bachelard and Canguilhem and new translations of texts by Hegel and Cassirer Contributors include Terry Pinkard Jean Gayon Richard Tieszen Michael Friedman Joseph Rouse Mary Tiles Hans J erg Rheinberger Linda Alcoff Todd May Axel Honneth and Penelope Deutscher **Beckett and Badiou** Andrew Gibson, 2007-01-11 Beckett and Badiou offers a provocative new reading of Samuel Beckett s work on the basis of a full critical account of the thought of Alain Badiou Badiou is the most eminent of contemporary French philosophers His devotion to Beckett s work has been lifelong Yet for Badiou philosophy must be integrally affirmative whilst Beckett apparently commits his art to a work of negation Beckett and Badiou explores the coherences contradictions and extreme complexities of the intellectual relationship between the two oeuvres It examines Badiou s philosophy of being the event truth and the subject and the importance of mathematics within his system It considers the major features of his politics ethics and aesthetics and provides an explanation interpretation critique and radical revision of his work on Beckett It argues that once revised Badiou s version of Beckett offers an extraordinarily powerful tool for understanding his work Badiou and Beckett are instances of a vestigial or melancholic modernism that is in the teeth of a contemporary culture that dreams ever more ambitiously of plenitude they commit themselves to a rigorous concept of limit and intermittency Truth and value are occasional and rare It is seldom that the chance event arrives to disturb the inertia of the world For Badiou however it is the event and its consequences alone that matter Beckett rather insists on the common experience of intermittency as destitution His art is a series of limit figures exquisitely subtle and nuanced forms for a world whose state of seemingly rigid paralysis is also always volatile delicately balanced

Intermittency Andrew Gibson, 2011-12-15 Explores the concept of historical intermittency in 5 recent French philosophers Andrew Gibson engages with five recent and contemporary French philosophers Badiou Jambet Lardreau Francoise Proust and Ranciere who each produce a post Hegelian philosophy of history founded on an assertion of the intermittency of historical value Gibson explores this anti schematics of historical reason and its implication for politics ethics

and aesthetics in a wide range of modern intellectual contexts finding its necessary complement and most powerful expression in a wealth of modern art chiefly modern literature The result is a sustained reflection on the possible character of a contemporary philosophy of history and an important contribution to our knowledge of contemporary French philosophy

The Adventure of French Philosophy Alain Badiou, 2022-03-01 The Adventure of French Philosophy is essential reading for anyone interested in what Badiou calls the French Moment in contemporary thought Badiou explores the exceptionally rich and varied world of French philosophy in a number of groundbreaking essays published here for the first time in English or in a revised translation Included are the often quoted review of Louis Althusser's canonical works For Marx and Reading Capital and the scathing critique of potato fascism in Gilles Deleuze and Félix Guattari's A Thousand Plateaus There are also talks on Michel Foucault and Jean-Luc Nancy and reviews of the work of Jean-François Lyotard and Barbara Cassin notable points of interest on an expansive tour of modern French thought Guided by a small set of fundamental questions concerning the nature of being the event the subject and truth Badiou pushes to an extreme the polemical force of his thinking Against the formless continuum of life he posits the need for radical discontinuity against the false modesty of finitude he pleads for the mathematical infinity of everyday situations against the various returns to Kant he argues for the persistence of the Hegelian dialectic and against the lure of ultraleftism his texts from the 1970s vindicate the role of Maoism as a driving force behind the communist Idea

Hippocrates and Medical Education Manfred Horstmanshoff, 2010-10-25 The collection of writings known as the Corpus Hippocraticum played a decisive role in medical education for more than twenty-four centuries This is the first full-length volume on medical education in Graeco-Roman antiquity since Kudlien's seminal article of 1970 Most of the articles in this volume were originally presented as papers at the XIIth International Colloquium Hippocraticum in Leiden in 2005

Identity and Difference Etienne Balibar, 2013-12-17 John Locke's foundational place in the history of British empiricism and liberal political thought is well established So in what sense can Locke be considered a modern European philosopher Identity and Difference argues for reassessing this canonical figure Closely examining the treatise on identity added to the second edition of An Essay Concerning Human Understanding Etienne Balibar demonstrates Locke's role in the formation of two concepts central to the metaphysics of the subject consciousness and the self and the complex philosophical legal moral and political nature of his terms With an accompanying essay by Stella Sandford situating Balibar's reading of Locke in the history of the reception of the Essay and within Balibar's other writings on the subject Identity and Difference rethinks a crucial moment in the history of Western philosophy

Canguilhem Stuart Elden, 2019-05-29 Georges Canguilhem 1904-95 was an influential historian and philosopher of science as renowned for his teaching as for his writings He is best known for his book The Normal and the Pathological originally his doctoral thesis in medicine but he also wrote a thesis in philosophy on the concept of the reflex supervised by Gaston Bachelard He was the sponsor of Michel Foucault's doctoral thesis on madness However his work extends far beyond

what is suggested by his association with these thinkers Canguilhem also produced a series of important works on the natural sciences including studies of evolution psychology vitalism and mechanism experimentation monstrosity and disease Stuart Elden discusses the whole of this important thinker's complex work including recently rediscovered texts and archival materials Canguilhem always approached questions historically examining how it was that we came to a significant moment in time outlining tensions detours and paths not taken The first comprehensive study in English this book is a crucial guide for those coming to terms with Canguilhem's important contributions and will appeal to researchers and students from a range of fields

Marxism in the Postmodern Age Antonio Callari, Stephen Cullenberg, Carole Biewener, 1994-10-01 Diverse Marxian intellectual cultures are having important effects on political struggles over the subjects of history and knowledge international law television the state democratic theories and institutions bodies sexuality masculinity environmentalism postmodernism labor the meanings of the end of the USSR children archaeology the meanings of Columbus cartography the North American economy welfare NAFTA the Gulf War higher education and the many other topics discussed by the contributors to this important volume These essays show readers how Marxism's continuing vitality derives from its profound allegiance to diverse struggles for social justice At this moment we need progressive imaginaries alternative to the tired and ineffectual ones that have left us with enormous challenges and compelling questions on every aspect of contemporary social relations Here well known thinkers are joined by important new voices in exploring fruitful directions for vision analysis and political action This is without question the best collection of mediations so far on postorthodox Marxian tendencies in contemporary global cultures

Deconstruction and the Reminders of Phenomenology Tilottama Rajan, 2002 This book disentangles two terms that were conflated in the initial Anglo American appropriation of French theory deconstruction and poststructuralism Focusing on Sartre Derrida Foucault and Baudrillard but also considering Levinas Blanchot de Man and others it traces the turn from a deconstruction inflected by phenomenology to a poststructuralism formed by the rejection of models based on consciousness in favor of ones based on language and structure The book provides a wide ranging and complex genealogy of French theory from the 1940s onward placing particular emphasis on the largely neglected early work of the theorists involved and on deconstruction's continuing relevance The author argues that deconstruction is a form of radical antiscientific modernity an interdisciplinary reconfiguration of philosophy as it confronted the positivism of the human sciences in the 1960s By contrast poststructuralism is a type of postmodern theory inflected by changes in technology and the mode of information Inasmuch as poststructuralism is founded upon its constitutive loss of phenomenology in Judith Butler's phrase the author is also concerned with the ways phenomenology particularly Sartre's forgotten but seminal Being and Nothingness is remembered repeated in different ways and never quite worked through in its theoretical successors Thus the book also exemplifies a way of reading intellectual history that is not only concerned with the transmission of concepts but also with the processes of transference mourning and disavowal that inform the

relationships between bodies of thought Modern European Criticism and Theory Julian Wolfreys, 2006-04-21 Modern European Criticism and Theory offers the reader a comprehensive critical overview of the widespread and profound contest of ideas within European theory The book focuses primarily on the thought of major voices in poetics philosophy linguistics and psychoanalysis as well as in literary and cultural studies from the Enlightenment to the present day Examining how conceptions of subjectivity identity and gender have been questioned the more than 50 essays written by acknowledged experts in their fields critically assess the ways in which we think see and act in the world as well as the ways in which we represent such thought psychologically politically and culturally A further reading list accompanies each chapter The Technique of Thought Ian James, 2019-02-26 Interrogating the work of four contemporary French philosophers to rethink philosophy's relationship to science and science's relationship to reality The Technique of Thought explores the relationship between philosophy and science as articulated in the work of four contemporary French thinkers Jean Luc Nancy Fran ois Laruelle Catherine Malabou and Bernard Stiegler Situating their writings within both contemporary scientific debates and the philosophy of science Ian James elaborates a philosophical naturalism that is notably distinct from the Anglo American tradition The naturalism James proposes also diverges decisively from the ways in which continental philosophy has previously engaged with the sciences He explores the technical procedures and discursive methods used by each of the four thinkers as distinct techniques of thought that approach scientific understanding and knowledge experimentally Moving beyond debates about the constructed nature of scientific knowledge The Technique of Thought argues for a strong variably configured and entirely novel scientific realism By bringing together post phenomenological perspectives concerning individual or collective consciousness and first person qualitative experience with science's focus on objective and third person quantitative knowledge James tracks the emergence of a new image of the sciences and of scientific practice Stripped of aspirations toward total mastery of the universe or a grand theory of everything this renewed scientific worldview along with the simultaneous reconfiguration of philosophy's relationship to science opens up new ways of interrogating immanent reality **Citizen Subject** Étienne Balibar, 2016-11-01 What can the universals of political philosophy offer to those who experience the living paradox of an inegalitarian construction of egalitarian citizenship Citizen Subject is the summation of Étienne Balibar's career long project to think the necessary and necessarily antagonistic relation between the categories of citizen and subject In this magnum opus the question of modernity is framed anew with special attention to the self enunciation of the subject in Descartes Locke Rousseau and Derrida the constitution of the community as we in Hegel Marx and Tolstoy and the aporia of the judgment of self and others in Foucault Freud Kelsen and Blanchot After the humanist controversy that preoccupied twentieth century philosophy Citizen Subject proposes foundations for philosophical anthropology today in terms of two contrary movements the becoming citizen of the subject and the becoming subject of the citizen The citizen subject who is constituted in the claim to a right to have rights Arendt cannot exist without an underside

that contests and defies it He or she because Balibar is concerned throughout this volume with questions of sexual difference figures not only the social relation but also the discontent or the uneasiness at the heart of this relation The human can be instituted only if it betrays itself by upholding anthropological differences that impose normality and identity as conditions of belonging to the community The violence of civil bourgeois universality Balibar argues is greater and less legitimate therefore less stable than that of theological or cosmological universality Right is thus founded on insubordination and emancipation derives its force from otherness Ultimately Citizen Subject offers a revolutionary rewriting of the dialectic of universality and differences in the bourgeois epoch revealing in the relationship between the common and the universal a political gap at the heart of the universal itself

ISLA 1 Tetsuji Yamamoto,1998 This volume presents original writings and interviews with prominent thinkers on the front lines of an international intellectual effort to reconsider the fundamental terms of modernity and promote a philosophical design that reconsiders the significance of modernity itself

Histories of the Normal and the Abnormal Waltraud Ernst,2006-09-27 This fascinating volume tackles the history of the terms normal and abnormal Originally meaning as occurring in nature normality has taken on significant cultural gravitas and this book recognizes and explores that fact The essays engage with the concepts of the normal and the abnormal from the perspectives of a variety of academic disciplines ranging from art history to social history of medicine literature and science studies to sociology and cultural anthropology The contributors use as their conceptual anchors the works of moral and political philosophers such as Canguilhem Foucault and Hacking as well as the ideas put forward by sociologists including Durkheim and Illich With contributions from a range of scholars across differing disciplines this book will have a broad appeal to students in many areas of history

An Epistemology of the Concrete Hans-Jörg Rheinberger,2010-09-06 Brings together case studies and theoretical reflections on the history and epistemology of the life sciences by Hans J rg Rheinberger one of the foremost philosophers of science

Medicine and Society, New Perspectives in Continental Philosophy Darian Meacham,2015-05-22 This volume addresses some of the most prominent questions in contemporary bioethics and philosophy of medicine liberal eugenics enhancement the normal and the pathological the classification of mental illness the relation between genetics disease and the political sphere the experience of illness and disability and the sense of the subject of bioethical inquiry itself All of these issues are addressed from a continental perspective drawing on a rich tradition of inquiry into these questions in the fields of phenomenology philosophical hermeneutics French epistemology critical theory and post structuralism At the same time the contributions engage with the Anglo American debate resulting in a fruitful and constructive conversation that not only shows the depth and breadth of continental perspectives in bioethics and medicine but also opens new avenues of discussion and exploration For decades European philosophers have offered important insights into the relation between the practices of medicine the concept of illness and society more broadly understood These interventions have generally striven to be both historically nuanced and accessible to non experts From Georges Canguilhem

s seminal *The Normal and the Pathological* Michel Foucault's lectures on madness sexuality and biopolitics Hans Jonas's deeply thoughtful essays on the right to die life extension and ethics in a technological age Hans Georg Gadamer's lectures on *The Enigma of Health* and more recently Jürgen Habermas's carefully nuanced interventions on the question of liberal eugenics these thinkers have sought to engage the wider public as much as their fellow philosophers on questions of paramount importance to current bioethical and social political debate The essays contained here continue this tradition of engagement and accessibility In the best practices of European philosophy the contributions in this volume aim to engage with and stimulate a broad spectrum of readers not just experts In doing so the volume offers a showcase of the richness and rigor of continental perspectives on medicine and society Writing the History of the Mind Cristina Chimisso, 2016-02-11

For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentality Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think Scholars including Gaston Bachelard Georges Canguilhem Léon Brunschvicg Lucien Lévy-Bruhl Lucien Febvre Abel Rey Alexandre Koyré and Henri Metzger were all investigating the mind historically and participating in shared research projects Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the history of philosophy and science and produced The Columbia History of Twentieth-century French Thought Lawrence D. Kritzman, Brian J. Reilly, M. B. DeBevoise, 2006 This valuable reference is an authoritative guide to 20th century French thought It considers the intellectual figures movements and publications that helped define fields as diverse as history psychoanalysis film philosophy and economics *The Care of Life* Miguel de Beistegui, Giuseppe Bianco, Marjorie Gracieuse, 2014-12-22 This interdisciplinary collection of essays demonstrates how the ethical and political problems we are confronted with today have come to focus largely on life The contributors to this volume define and assess the specific meaning of life itself It is only by doing so that we can understand

why life has become an all encompassing problem why all questions especially ethical and political have become vital questions We have reached a moment in history where every distinction and opposition is no longer in relation to life but within it and where life is at once a theoretical and practical problem This book throws light on this nexus of problems at the heart of contemporary debates in bioethics and biopolitics It helps us understand why and how life is understood valued cared for and framed today Taking a genuinely transdisciplinary approach these essays demonstrate how life is a multifaceted problem and how diverse the origins foundations and also consequences of bioethics and biopolitics therefore are
