Getting to the Core of Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6–12 Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore. The new Common Core English Language Arts Standards aren't just for English teachers. Fluent reading and writing are critically important to the study of history, social studies, science, and technical subjects too. What's more, the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing. So how do you make literacy a focus of your teaching without taking time away from essential content? This practical resource, packed with teacher-tested CCSS-based sample lessons, shows you how using the Backward Design approach to set and meet your goals. Each lesson template includes the teaching strategies you'll utilize, ways to incorporate technology and media, variations for differentiation and interdisciplinary connections, links to the work of major educational theorists. Following these models, you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom. Before you know it, you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways. *Common Core Mathematics in a PLC at Work™, High School* Timothy D. Kanold, 2012-05-09 This teacher guide illustrates how to sustain successful implementation of the Common Core State Standards for mathematics for high school. Discover what students should learn and how they should learn it. Comprehensive research-affirmed analysis tools and strategies will help you and your collaborative team develop and assess student demonstrations of deep conceptual understanding and procedural fluency. **Teaching to Exceed the English Language Arts Common Core State Standards** Richard Beach, Amanda Haertling Thein, Allen Webb, 2012-06-25 As the new English Language Arts Common Core State Standards take hold across the United States, the need grows for pre-service and in-service teachers to be ready to develop curriculum and instruction that addresses their requirements. This timely, thoughtful, and comprehensive text directly meets this need. It delineates a literacy practices and critical engagement curriculum framework for 6–12 English language arts education that explains and illustrates how the Standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective that is firmly grounded in current literacy learning theory and research. The first 6–12 English language arts methods text to be aligned with the Standards, this book also addresses their limitations: formalist assumptions about literacy learning, limited attention to media, digital literacies, lack of attention to critical literacies, and questionable assumptions about linking standards and text complexity to specific grade levels. Specific examples of teachers using the literacy practices critical engagement curriculum framework in their classrooms show how these limitations can be surpassed. Features: Moves the CCSS framework into a view that literacy is a contextualized social practice. Challenges simplistic models that homogenize adolescent learners. Adds the important element of critical literacy to English language arts classrooms. Provides specific examples of teachers in action implementing these practices.
