Davies, 2014-01-29 Reporting on front line research into these natural materials this volume focuses on the use of chemical and physical methodology in seeking an explanation of the structures of humic substances HSs and their relation to their microscopic properties **DNA and RNA Origami** Julián Valero, 2023-05-11 This volume details diverse methodological approaches on the assembly and applications of DNA origami assemblies Chapters guide readers through different synthetic and computational methods isolation and structural characterization of 2D and 3D DNA origami nanoarchitectures nanophotonics drug delivery biophysics and synthetic biology Written in the successful Methods in Molecular Biology series format chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible protocols and notes on troubleshooting and avoiding known pitfalls Authoritative and cutting edge DNA and RNA Origami Methods and Protocols aims to serve as a guideline describing the current state of the art assembly methodologies and applications of DNA origami nanostructures *Green Fluorescent Protein* P. Michael Conn, 1999-04-02 One of the most important recent discoveries in science is the green fluorescent protein isolated from a bioluminescent jellyfish The gene that codes for this protein is active in any type of cell from microbes to humans producing a day glo dye visible as a bright green light in the microscope The power of the gene is that by using recombinant DNA technology GFP can be spliced to any protein essentially painting that protein green When such a spliced protein is inside a cell Further time lapse microscopy can be used to examine how that protein and the cellular components that it is part of move within the cell during the cell's life cycle This Methods in Enzymology volume deals with the utility of green fluorescent protein GFP The OVID database including MEDLINE Current Contents and other sources lists nine references to GFP for the ten year period 1985 1994 In contrast in less than four years thereafter over 500 references are listed a testament to the rapid growth of

interest in this probe This volume documents many diverse uses for this interesting molecule in disciplines that broadly span biology The methods presented include shortcuts and conveniences not included in previously published sources The techniques are described in a context that allows comparisons to other related methodologies such comparisons are valuable to readers who must adapt existing procedures to new systems Also so far as possible methodologies have been presented in a manner that stresses their general applicability and potential limitations The volume provides a substantial and current overview of the extant methodology in the field and a view of its rapid development The critically acclaimed laboratory standard for more than forty years *Methods in Enzymology* is one of the most highly respected publications in the field of biochemistry Since 1955 each volume has been eagerly awaited frequently consulted and praised by researchers and reviewers alike Now with more than 300 volumes all of them still in print the series contains much material still relevant today truly an essential publication for researchers in all fields of life sciences Key Features Monitoring of Physiological Processes Localization of Molecules Special Uses Mutants Variants of GFP **Microscopy and Analysis** ,2000 *In Vivo* ,2004 **Proceedings of the National Academy of Sciences of the United States of America** National Academy of Sciences (U.S.),2002 **The Journal of Cell Biology** ,2007 No 2 pt 2 of November issue each year from v 19 1963 47 1970 and v 55 1972 contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology 3d 1963 10th 1970 and 12th 1972
