Blackburn, 2012-02-01 In its determination to take absolute control the Third Reich focused on the nation s youth reserving for the schools the vital task of refashioning the German psyche This book examines these propaganda efforts one of the most radical and far reaching experiments in educational history The book focuses on the manipulation of the German past one of the primary means of state intervention to ensure the triumph of the racial idea in history It shows how textbooks written by National Socialists equalled or exceeded the most imaginative fiction with an itinerary that extended from Valhalla and the Germania of Tacitus to the Prussia of Frederick the Great before mounting to the pinnacle represented by the Third Reich The primary source materials for this study consist of a broad representative collection of history textbooks primers and books of readings containing historical instruction

Bergen situates the Holocaust in its historical political social cultural and military contexts Unlike many other treatments of the Holocaust this revised third edition discusses not only the persecution of the Jews but also other segments of society victimized by the Nazis Roma homosexuals Poles Soviet POWs the disabled and other groups deemed undesirable In clear and eloquent prose Bergen explores the two interconnected goals that drove the Nazi German program of conquest and genocide purification of the so called Aryan race and expansion of its living space and discusses how these goals affected the course of World War II Including firsthand accounts from perpetrators victims and eyewitnesses her book is immediate human and eminently readable *Hitler in History* Eberhard Jaeckel, Professor Eberhard Jackel, 2000-10-03 A leading interpreter of the Nazi period addresses crucial issues in modern European and contemporary history

Psychology and Historical Interpretation William McKinley Runyan, 1988 What kind of psychology should be used in historical interpretation How should it be used and on what range of historical problems These are some of the basic questions addressed by the distinguished contributors

The Voice of Conscience Mika Ojakangas, 2013-07-18 In Western thought it has been persistently assumed that in moral and political matters people should rely on the inner voice of conscience rather than on external authorities laws and regulations This volume investigates this concept examining the development of the Western politics of conscience from Socrates to the present and the formation of the Western ethico political subject The work opens with a discussion of the ambiguous role of conscience in politics contesting the claim that it is the best defense against totalitarianism It then look back at canonical authors from the Church Fathers and Luther to Rousseau and Derrida to show how the experience of conscience constitutes the foundation of Western ethics and politics This unique work not only synthesizes philosophical and political insights but also pays attention to political theology to provide a compelling and innovative argument that the experience of conscience has always been at the core of the political Western tradition An engaging and accessible text it will appeal to political theorists and philosophers as well as theologians and those interested in the critique of the Western civilization
