

Before Conditioning:

Prior to conditioning, the dog notices the bell ringing, but does not salivate. Here, the bell is a neutral stimulus. Food placed in the dog's mouth (the **UCS**) naturally produces the salivation reflex (the **UCR**).

During Conditioning:

In the conditioning phase, the neutral stimulus (the ringing bell) is repeatedly sounded immediately before food is placed in the dog's mouth (the **UCS**), which produces the natural reflex of salivation (the **UCR**).

After Conditioning:

The ringing bell is no longer neutral. It is now called a **CS** because, when the bell is rung, the dog reacts with a conditioned reflex: it salivates even though no food is present. The salivation response is called a **CR**.
