Hourly Rounding Evidence Based Practice:

Evidence-based Practice in Nursing & Healthcare Bernadette Mazurek Melnyk, Ellen Fineout-Overholt, 2011 Bernadette Mazurek Melnyk and Ellen Fineout Overholt are creators of the ARCC Advancing Research and Clinical practice through close Collaboration Model an innovative strategy for implementing and sustaining evidence based practice in healthcare systems The ARCC Model is cited as an exemplar of education in evidence based practice in the Board on Health Care Services and the Institute of Medicine's book *Health Professions Education A Bridge to Quality* Melnyk and Fineout Overholt's book should be required reading in all graduate programs Their text has provided a blueprint for the future of nursing practice and a rigorously substantiated and clearly described means for clinicians educators and administrators to participate in improving quality of care Janet D Allan PhD RN FAAN Dean and Professor University of Maryland School of Nursing *Evidence based Practice in Nursing Healthcare A Guide to Best Practice* has been instrumental in developing a culture of evidence based practice at Barnes Jewish Hospital It is fundamental to our curriculum provided to all levels of staff from new graduate nurses to the highest levels of hospital leadership Dr Patricia Potter RN PhD FAAN Dr Gail Rea RN PhD CNE Dr Karen Balakas RN PhD CNE Jennifer Williams MSN RN ACNS BC Elizabeth Pratt MSN RN ACNS BC Evidence Equals Excellence group at Barnes Jewish Hospital and Barnes Jewish School of Nursing at Goldfarb *Evidence based Practice in Nursing Healthcare A Guide to Best Practice* is an exemplary text that spans the continuum of nursing evidence to support best practice Utilizing this text with undergraduate RN to BSN and graduate nursing students it is the ONLY text that demonstrates how to retrieve read and analyze evidence whether it is published as an individual study systematic review meta analysis best practice guideline or outcomes management report Students learn how to utilize multiple complex databases and websites as they move through each chapter And they experience dissemination of evidence through the development of presentations publications posters and grants This is truly a remarkable book that embraces evidence as the basis for nursing practice and patient centered care and safety Having used this text with more than 1000 students over the past five years I can honestly say that I have found no other text that facilitates learning and development of clinical judgment that is grounded in valid reliable and applicable evidence This is a keeper Alice E Dupler JD APRN BC Clinical Associate Professor Washington State University College of Nursing I have used the book since I developed the Evidence based Practice course for our College of Nursing in Fall 2007 It was the first course of its kind at Indiana State University It has been well received and the preferred course for all nursing graduate students for completion of their final scholarly projects The text was essential in developing the course and provides the foundation and guidance that the students need to develop their Evidence Based Practice projects the students love the text Susan Eley PhD RN FNP BC Assistant Professor Director FNP Program Indiana State University Impacting Patient Care Experiences: Hourly Rounding Michelle R Johnson Hernandez, 2015 *Impacting Patient Care Experiences with Hourly Rounding* My global aim consists of cultivating

communication and staff responsiveness within a busy nursing unit in an urban setting within a San Francisco hospital thereby improving the patient's perception of staff responsiveness by reducing call lights and patient falls by 25% within three months. The patient population consists of cardiovascular and thoracic post-operative surgical patients of all ages primarily adults. The implementation of the evidence-based practice of hourly rounding has been proven to increase overall patient satisfaction by improving staff responsiveness and increasing patient safety within many hospitals. The measurement of effectiveness and success will be evidenced by seeing an increase in patient care scores and a reduction of falls within the unit when these metrics are met; there is data that proves that this evidence-based practice will drive the results we are looking for. In this microsystem, there are many indicators that a more efficient workflow is necessary to be established. There is the constant sound of call lights ringing about an estimated 12-15 in an eight-hour shift for non-urgent needs. Upon interviewing many staff, I found there was an inconsistent way and lack of education on how hourly rounds should be performed. Basic patient needs were not addressed within each visit from a staff member. By using a process map, timeline, PDSA, Lewin's Change Theory, SWOT analysis, and graphs, I can show you my process of improving staff responsiveness within the nursing unit. In conclusion, as a Clinical Nurse Leader and patient advocate, I have utilized the information gained from the microsystem data and implementation of hourly rounding, thereby proving how to improve quality, safety, and patient care experiences within the busy medical surgical nursing unit with the evidence-based practice of hourly rounding.

Exploring Evidence-based Practice Martin Lipscomb, 2015-07-30 Despite sustained debate and progress the evolving thing that is evidence based nursing or practice EBP continues to dangle a variety of conceptual and practical loose threads Moreover when we think about what is being asked of students and registered or licenced practitioners in terms of EBP it is difficult not to concede that this ask is in many instances quite large and occasionally it may be unachievable EBP has and continues to improve patient client and user care Yet significant questions concerning its most basic elements remain unresolved and if nurses are to contribute to the resolution or reconfiguration of these questions then as a first step we must acknowledge their existence From a range of international standpoints and perspectives contributors to this book focus on aspects of EBP that require development This

focus is always robust and at times it is unashamedly provocative Contributors challenge readers to engage with anomalies that surround the subject and readers are asked to consider the often precarious assumptions that underpin key aspects of EBP While both conflict and concord are evident among the various offerings presented here the book nonetheless creates and sustains a narrative that is bigger or more substantial than the sum of individual parts And across contributions a self assuredly critical stance towards EBP as currently practiced conceptualized and taught coexists alongside respectful admiration for all who make it happen Exploring Evidence based Practice Debates and Challenges in Nursing should be considered essential reading for academics and postgraduate students with an interest in evidence based practice and nursing research
