Video Theory Andreas Treske, 2015-04-15. Video is a part of everyday life comparable to driving a car or taking a shower. It is nearly omnipresent, available on demand, and attached to nearly anything anywhere. Online Video became something vital and independent. With all the video created by the cameras around us, constantly uploading, sharing, linking, and relating, a blue ocean is covering our planet, an ocean of video. What might look as bluish noise and dust from the far outside might embed beautiful and fascinating living scapes of moving images, objects constantly changing, re-arranging, assembling, evolving, collapsing, but never disappearing, a real cinema. Andreas Treske describes and theorizes these objects, formerly named video, their forms, behaviours, and properties.

God the Geometer Thomas J. McAvoy, 2024-02-16. Faith is under assault today in the media and on college campuses. Numerous recent surveys show that college professors and contemporary scientists have lower religiosity compared to the general population. Parents are concerned that their children's faith is not as strong as it should be. Unfortunately, scientific advances can lead people to think that faith is passe, supplanted by science and no longer necessary. The average person is in awe of the accomplishments of science but overwhelmed by their complexity. The purpose of this book is to demonstrate what one can learn from modern science that leads to the conclusion that God created our universe. This book demonstrates how cosmology, physics, astronomy, and evolution do not conflict with faith but actually strongly support faith in God. The title of this book, *God the Geometer*, describes an image which appeared in a thirteenth century codex. The image conveys the message that God created the universe using geometric and harmonic principles.
