

Four Types of Academic Summaries

Summary papers

The entire paper is a summary of a specific work. May be 3-4 pages, depending on the original. Usually, 1/4 length of the original.

Annotated bibliographies

Short paragraphs about each source you use as a reference for your essay. Summarize (2-3 sent.) the original and explain why it matters for your paper.

Academic notes

Summarize a class discussion, lesson, or reading in the form of personal notes.

Summaries within essays

Quick summaries within the body of another assignment, introducing the source before using its ideas to support your arguments.

The Craft of Model-Based Testing Paul C. Jorgensen,2017-05-08 In his latest work author Paul C Jorgensen takes his well honed craftsman s approach to mastering model based testing MBT To be expert at MBT a software tester has to understand it as a craft rather than an art This means a tester should have deep knowledge of the underlying subject and be well practiced in carrying out modeling and testing techniques Judgment is needed as well as an understanding of MBT the tools The first part of the book helps testers in developing that judgment It starts with an overview of MBT and follows with an in depth treatment of nine different testing models with a chapter dedicated to each model These chapters are tied together by a pair of examples a simple insurance premium calculation and an event driven system that describes a garage door controller The book shows how simpler models flowcharts decision tables and UML Activity charts express the important aspects of the insurance premium problem It also shows how transition based models

finite state machines Petri nets and statecharts are necessary for the garage door controller but are overkill for the insurance premium problem Each chapter describes the extent to which a model can support MBT The second part of the book gives testers a greater understanding of MBT tools It examines six commercial MBT products presents the salient features of each product and demonstrates using the product on the insurance premium and the garage door controller problems These chapters each conclude with advice on implementing MBT in an organization The last chapter describes six Open Source tools to round out a tester's knowledge of MBT In addition the book supports the International Software Testing Qualifications Board's ISTQB MBT syllabus for certification

Request Sequences Carmen Taleghani-Nikazm, 2006-01-01 This monograph provides a micro analytic description of instances of requests in everyday German conversation Using the framework of CA the study systematically analyzes the grammatical and syntactical structure of the request turn and its response and of the conversational exchanges before and within the request base sequence and the placement of the request sequence within the larger social interaction Through an empirical analysis of individual cases of request sequences in German the monograph describes in detail a how speakers employ grammar and syntax as resources to construct turns at talk and accomplish the social action of request b how speakers use grammatical and syntactical forms of the language to coordinate the production of the social action of requests c how speakers use grammar and syntax as interactional resources to manage affiliative and remedial work i e face work when performing delicate social actions such as requests and d how the context of the request activity impacts the grammatical and syntactical constructions of speakers' utterances Additionally the monograph demonstrates that both the grammatical construction of turns and their placement within the talk are oriented to the sequential context of the interaction
