### **The Long Essay as a Structured Piece of Writing**

**Aloy Nnamdi Obika, PhD & Obiora Eke, PhD**

#### **Introduction**

Long essays are research papers produced either in partial fulfilment for passing a tertiary institution's course, or as it is in few universities, as the only requirement for a PhD dissertation. Such essays include term papers, proposal papers, first and second degrees and diploma projects and doctor of philosophy dissertations. The aim of such papers is to throw more light or make more discoveries in the field of scholarship. In this way, every long essay ends up discovering a lacuna (a gap) which when filled, brings about new theories, principles or facts hitherto not recognized. Therefore a new research can reveal some abnormalities in already existing field of knowledge.

In the field of arts and humanities, every long essay starts with the researcher reading widely, most often starting with encyclopedias and periodicals. Such gives the researcher a broad view of the general field he is researching on before he goes deeper by reading other texts. As the researcher reads, he should be taking notes and be jotting down the ideas he comes across. Also, it is necessary that the ideas that belong to another person are not mistakenly usurped by the researcher for such will amount to plagiarism which is a very serious crime in academics. As the person reads, he ought to be noting the ideas he comes across, sometimes writing them verbatim and at other times, paraphrasing. When he starts writing, he uses some of them to buttress his stand, and others, to show contradictory views. In writing down these, he should be doing so on 5×9 inches cards. Such cards can be gotten from printers who refer to them as off-cuts. Alternatively, the researcher can cut a cardboard sheet into such dimensions. The importance of using such cards with every information included (titles, whether of journals or newspapers, books, et cetera and their imprints, page numbers and the writers' ideas) is that they can be arranged according to the needs of the researcher. However, any of them can easily be misplaced or even lost but by tying them together with a rubber band, such can be minimized.
