Digital Football Cultures Stefan Lawrence, Garry Crawford, 2018-09-03 As the digital revolution continues apace, emergent technologies and means of communication present new challenges and opportunities for the football industry. This is the first book to bring together key contemporary debates at the intersection of football studies, leisure studies, and digital cultural studies. It presents cutting-edge theoretical and empirical work based around four key themes: theorizing digital football cultures; digital football fandom; football and social media; and football sub-cybercultures. Covering topics such as transnational digital fandom, online abuse, and gender, *Digital Football Cultures* argues that we are witnessing the hyperdigitalization of the world's most popular sport. This book is a valuable resource for students and researchers working in leisure studies, sports studies, football studies, and critical media studies, as well as geography, anthropology, criminology, and sociology. It is also fascinating reading for anybody working in sport media and culture.

Language for Specific Purposes Giuliana Elena Garzone, Dermot Heaney, Giorgia Riboni, 2017-01-06 This volume brings together work by both well-known scholars and emerging researchers in the various areas of Language for Specific Purposes (LSP), such as political, legal, medical, and business discourse. The volume is divided into three parts in order to align, rather than separate, three different but related aspects of LSP: namely, translation; linguistic research; and domain-specific communication on the web. Underlying all the contributions here is the growing awareness of the ever-increasing multifariousness of specialised communication and the ever-wider social implications of the communicative situations in which it is embedded, especially where it involves the need to move across languages, cultures, and modes, as in translation and interpreting. The contributions consistently bear witness to the need to review received notions, pose new questions, and explore fresh perspectives. The picture that emerges is one of extreme complexity in which researchers, into specifically linguistic aspects of LSPs and their translation across languages and media, declare their awareness of the pressing need to come to terms with a wide range of social, pragmatic, intercultural, and political factors, above and beyond socio-technical knowledge of the domains under investigation.

Curi, 2016-04-14 No other national stereotype in the world is so closely tied with a sport as Brazil is with football The five time world champions have constructed their national identity around this sport Perhaps for this reason it's no wonder that there are many Brazilian social scientists doing research on this theme The first part of this volume is dedicated to the history of Brazilian football The main question is how did football become so popular in the country It also looks at other interesting historical developments in Brazilian football history up to this day The second part considers current phenomena especially the place of Brazilian football in a globalized world What are the consequences of an extremely commercialized and mediatized sport on a developing country How does Brazil figure as the main supplying country of football talents How does the population feel about seeing their players in Europe instead of their own country Finally the book will conclude with a critique of a documentary film about a Brazilian national team game in Haiti which was part of the Brazilian army's blue helmet mission The game was used as a political instrument revealing the importance of this sport in attaining a political position for Brazil in the world This book was previously published as a special issue of *Soccer and Society* Guinness World Records 2015 Gamer's Edition Guinness World Records, 2014-11-11 Now in its eighth edition Guinness World Records
