Computers and the Internet have revolutionized the modern world but if you're like most people you have no clue how these things work and don't know the real threats. Protecting your computer is like defending a medieval castle. While moats, walls, drawbridges, and castle guards can be effective, you'd go broke trying to build something dragon proof. This book is not about protecting yourself from a targeted attack by the NSA; it's about armoring yourself against common hackers and mass surveillance. There are dozens of no-brainer things we all should be doing to protect our computers and safeguard our data, just like wearing a seat belt, installing smoke alarms, and putting on sunscreen. Author Carey Parker has structured this book to give you maximum benefit with minimum effort. If you just want to know what to do, every chapter has a complete checklist with step-by-step instructions and pictures. The book contains more than 150 tips to make you and your family safer. It includes added steps for Windows 10 Spring 2018 and Mac OS X High Sierra. Expanded coverage on mobile device safety. Expanded coverage on safety for kids online. More than 150 tips with complete step-by-step instructions and pictures. What You'll Learn: Solve your password problems once and for all. Browse the web safely and with confidence. Block online tracking and dangerous ads. Choose the right antivirus software for you. Send files and messages securely. Set up secure home networking. Conduct secure shopping and banking online. Lock down social media accounts. Create automated backups of all your devices. Manage your home computers. Use your smartphone and tablet safely. Safeguard your kids online. And more. Who This Book Is For: Those who use computers and mobile devices but don't really know or frankly care how they work. This book is for people who just want to know what they need to do to protect themselves step by step without judgment and with as little jargon as possible.
