How Big Is The Auto Industry:

U.S. Automotive Industry Stephen Cooney, Brent D. Yacobucci, 2007 Over one million Americans are employed in manufacturing motor vehicles equipment and parts But the industry has changed dramatically since the U S Big Three motor vehicle corporations General Motors Ford and Chrysler produced the overwhelming majority of cars and light trucks sold in the United States and directly employed many people themselves By 2003 most passenger cars sold in the U S market were either imported or manufactured by foreign based producers at new North American plants so called transplant facilities The Big Three now dominate only in light trucks and are also now being challenged there by the foreign brands The Big Three have shed about 600 000 U S jobs since 1980 while about one quarter of Americans employed in automotive manufacturing nearly 300 000 work for the foreign owned companies It is clear that the U S automotive industry has undergone many drastic changes that have had a net adverse effect on American interests This book examines the causes of these changes Congressional acts increasingly stringent emission laws the effects of NAFTA labour unions and globalisation are all within the scope of this book *Examining the State of the Domestic Automobile Industry* United States. Congress. Senate.

Committee on Banking, Housing, and Urban Affairs, 2009 Examining the State of the Domestic Automobile Industry- Part II, S.Hrg. 110-878, December 4, 2008, 110-2 Hearing, *, 2009 **Competitiveness of the U.S. Automobile Industry**

United States. Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Economic Stabilization, 1985 *The North American Auto Industry since NAFTA* Greig Mordue, Dimitry Anastakis, 2024-10-01 The auto sector is North America s most iconic of industries Since the North American Free Trade Agreement came into existence in 1994 the sector has undergone tremendous change escalating concerns around climate change advances in electric and automated vehicles deindustrialization reindustrialization and the rise of low cost locations as hubs for manufacturing The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America The collection addresses the punctuations that have afflicted the industry since NAFTA s implementation as well as the slower incremental evolutions that have also occurred Several aspects of automobility and the industry are explored including but not limited to the Canadian American and Mexican automotive sectors and their evolution and interaction under evolving trade regimes The book analyses issues surrounding labour technology trade policy regional development the environment and broader societal impacts of the automobile It also draws on the expertise of a wide cross section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America s economic business and political landscape The American Automobile Industry John Bell Rae, 1984 Japan and the Global Automotive Industry Koichi Shimokawa, 2010-06-03 The Japanese automotive industry enjoyed spectacular success in the 1980s This was largely due to the so called Lean Production System the combination of an efficient production system an effective supplier system and a product development system In

the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation In this book eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms to show how the Japanese automotive industry has managed to recover from this difficult period He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets In addition the book also addresses the two major challenges to the current industry model the rise of China and the environmental and energy supply situation
