Whistleblowers Allison Stanger, 2019-09-24 A brisk and interesting exploration of exposing misconduct in America from the Revolutionary War era to the Trump years Jill Lepore The New Yorker PROSE Award winner in the Government Policy and Politics category Misconduct by those in high places is always dangerous to reveal Whistleblowers thus face conflicting impulses by challenging and exposing transgressions by the powerful they perform a vital public service yet they always suffer for it This episodic history brings to light how whistleblowing an important but unrecognized cousin of civil disobedience has held powerful elites accountable in America Analyzing a range of whistleblowing episodes from the corrupt Revolutionary War commodore Esek Hopkins whose dismissal led in 1778 to the first whistleblower protection law to Edward Snowden to the dishonesty of Donald Trump Allison Stanger reveals the centrality of whistleblowing to the health of American democracy She also shows that with changing technology and increasing militarization the exposure of misconduct has grown more difficult to do and more personally costly for those who do it yet American freedom especially today depends on it A stunningly original deeply insightful and compelling analysis of the profound conflicts we have faced over whistleblowing national security and democracy from our nation's founding to the Age of Trump Geoffrey R Stone award winning author of Perilous Times This clear eyed sobering book narrates a history of whistle blowing from the American Revolution to Snowden to Comey and delivers the verdict that the republic is at risk a must read Danielle Allen award winning author of Our Declaration

Schooled and Sorted Thurston Domina, Andrew M. Penner, Emily K. Penner, 2023-06-22 We tend to view education primarily as a way to teach students skills and knowledge that they will draw upon as they move into their adult lives However schools do more than educate students they also place students into categories such as kindergartner English language learner or honor roll student In Schooled Sorted Thurston Domina Andrew M Penner and Emily K Penner explore processes of educational categorization in order to explain the complex relationship between education and social inequality and to identify strategies that can help build more just educational systems Some educational categories have broadly egalitarian consequences Indeed Domina Penner and Penner argue that when societies enroll young people in school making them students they mark them as individuals who are worthy of rights But other educational categories reinforce powerful social categories including race gender and class and ultimately reproduce social and economic inequality in society Elite colleges tracked high schools and elementary school gifted programs provide not only different educational experiences but also create merit and inequality by sorting students into categories that are defined by the students who are excluded Schooled Sorted highlights that many of the decisions that define educational categories occur in school based committee meetings and other relatively local settings The local nature of these decisions provides many opportunities to define educational categories differently and for school communities to bring about change Schooled Sorted is an illuminating investigation into the ways sorting within schools translates into

inequality in the larger world While some educational categorization may be unavoidable the authors suggest ways to build a more equitable system and thus a more equitable society Gendered Paths into STEM.
