Discourses of Globalisation and Higher Education Reforms Joseph Zajda, W. James Jacob, 2022-03-15 This book examines some of the major higher education reforms and policy shifts globally particularly in the light of recent shifts in quality and standards driven education and policy research. It critiques the neo liberal ideological imperatives of current higher education and policy reforms and illustrates the way that changes in the relationship between the state and higher education policy affect current trends in higher education reforms. Using diverse comparative education paradigms from critical theory to historical comparative research the chapters focus on globalisation ideology and higher education reforms and examine both the reasons and outcomes of higher education reforms and policy change. The book analyses and evaluates the policy shifts in methodological approaches to globalisation and higher education reforms and their impact on education policy and pedagogy. The book contributes in a very scholarly way to a more holistic understanding of the nexus between globalisation comparative education research and higher education reforms.

Promoting Gender Equity in Selected Public Universities of Kenya Jane Onsongo, 2011 The purpose of this study was to examine sustainable gender equity interventions in selected public universities. The study used descriptive survey and case study research methods to carry out an in depth analysis of the gender equity interventions in selected public universities in Kenya. The sample consisted of four public universities that were selected because they had established gender centers/institutes that were assumed to be coordinating gender equity intervention. The study has the following objectives: To establish the existing gender inequalities in the formal organisational structure of the selected universities; To identify and assess sustainability of gender equity interventions in the selected public universities; To analyse the national, regional, international and organisational culture and policy contexts that have influenced and supported the introduction of the identified gender equity interventions; To investigate the attitudes of staff, students and management towards the gender equity interventions and to recommend appropriate institutional strategies to address existing gender inequities.
