Campus Support Services, Programs, and Policies for International Students Bista, Krishna, 2016-01-12 Study abroad programs have proven beneficial for both the international student as well as the domestic community and school population interacting with the student. In an effort to promote cultural awareness, intercultural communications as well as opportunities for future study abroad program success, universities must take care to provide international students with the resources necessary to succeed while studying abroad. *Campus Support Services, Programs and Policies for International Students* explores the role of university administration in successful implementation, regulation and support of study abroad experiences. Highlighting essential topics relating to legal issues, safety concerns, curriculum development and intercultural communication, this research-based publication is an ideal reference source for university administrators, school counselors, policymakers and researchers interested in study abroad program implementation, regulation and success factors at the administrative level.

Critical Literacy Pedagogy for Bilingual Preservice Teachers Hyesun Cho, 2018-02-15 This book presents a participatory action research study exploring the social identity and academic literacies of bilingual preservice teachers. It describes the transformative experiences of undergraduate students during their participation in a program specially designed to develop bilingual teachers in Hawaii, USA. Further, it discusses how the curriculum and instruction in the classroom provide a third space for facilitating peer interaction and critical reflection on such issues as academic literacy, heritage language education and teacher identity. In doing so, it connects ideas of social identity and academic literacies of bilingual preservice teachers to the real work of mentoring and teaching PreK-12 students themselves.

Handbook of Blended Shore Education Gabriele Strohschen, 2008-11-07 As we confront the future of our professional endeavors, we tend to rely with confidence on longstanding and widely honored assumptions about the world and ourselves. We believe we have accumulated sturdy structures of knowledge, effective practices and sound values. Yet we rely on these resources with scant consciousness that in the long run, our assumptions, practices and values may not only be inimical to the viability of our profession but as well oppressive in their effects on others. There is at least one assumption common across many professions and cultures that is of particular significance. It is the assumption that the world is made up of discrete entities or units. There are not only the species of plants and animals, for example, but there is me as opposed to you, us vs. them, my business enterprise in competition with yours, our nation or religion and yours. And with this assumption of separable units, we assemble ways of sustaining and protecting those units of which we feel a part. We erect buildings, laws, schools, governments and armies to ensure that what is inside the boundary will flourish and what is outside cannot threaten us. In effect, the assumption of a world of independent entities establishes the way in which we understand and conduct ourselves within relationships.

Nation Building in South Korea Gregg A. Brazinsky, 2009-11-20 In this ambitious and innovative study, Gregg Brazinsky examines

American nation building in South Korea during the Cold War Marshaling a vast array of new American and Korean sources he explains why South Korea was one of the few postcolonial nations that achieved rapid economic development and democratization by the end of the twentieth century Brazinsky contends that a distinctive combination of American initiatives and Korean agency enabled South Korea's stunning transformation On one hand Americans supported the emergence of a developmental autocracy that spurred economic growth in a highly authoritarian manner On the other hand Americans sought to encourage democratization from the bottom up by fashioning new institutions and promoting a dialogue about modernization and development Expanding the framework of traditional diplomatic history Brazinsky examines not only state to state relations but also the social and cultural interactions between Americans and South Koreans He shows how Koreans adapted resisted and transformed American influence and promoted socioeconomic change that suited their own aspirations Ultimately Brazinsky argues Koreans capacity to tailor American institutions and ideas to their own purposes was the most important factor in the making of a democratic South Korea
