

Sewing with the 'Green' Automatic Stitches

Use preferably

- the clip-on (metal) presser foot for straight and linear stitches and
- the clip-on (plastic) embroidery foot for closely sewn stitches (satin, edging, etc.)
- * Make sure that the foot pressure knob is at "1" and the drop-feed lever is at its upper position, and after having lowered the foot.
- * To start sewing, lower the needle into the material and hold back the two threads, while sewing the first two or three stitches.

Guide only by following the material along the foot with the fingers, without holding back (do not pull the material from behind). At the same time, carefully observe the seam. You can thus keep a check on your sewing, without any risk of pricking your fingers accidentally.

Sewing with Straight Stitches, Forwards

Leave the stitch selector at "1".

Turn the stitch length wheel to between 2 and 4, depending on the length desired. You will then sew straight stitches 2 to 4 mm long, depending on the work or on the fabric.

Reverse Sewing with Straight Stitches

For reverse sewing, push the reverse lever down as far as it will go. This is often used at the beginning and end of a seam, when doing ordinary sewing, to fasten the ends of the seam.

Removing the Material

To remove the material, first turn the handwheel towards you, by hand, to raise the thread take-up lever to its highest position. This is essential for finishing the stitch. Moreover, it will also ensure that the next seam can be started easily. Raise the presser foot lever. Pull out the material towards the rear and cut the threads with the thread cutter on the presser bar.
