**Abstract:** The purpose of this study was to examine the effects of a 12-week, 3-day-per-week, 100-min-per-session, low-impact aerobically demanding dance program on the physical fitness of 10 sedentary, middle-aged women. The program was designed to be enjoyable and to include a variety of dance styles. The program was evaluated using a pretest and a posttest. The results of the study showed that the program had a positive effect on the physical fitness of the women. The women showed significant improvements in their cardiovascular fitness, muscular strength, and flexibility. The program was also found to be enjoyable and to have a positive effect on the women's self-esteem and body image. The results of this study suggest that a low-impact aerobically demanding dance program can be an effective way to improve the physical fitness of sedentary, middle-aged women.
