David Mech, 2015-05-22 The interactions between apex predators and their prey are some of the most awesome and meaningful in nature displays of strength endurance and a deep coevolutionary history And there is perhaps no apex predator more impressive and important in its hunting or more infamous more misjudged than the wolf Because of wolves' habitat speed and general success at evading humans researchers have faced great obstacles in studying their natural hunting behaviors The first book to focus explicitly on wolf hunting of wild prey Wolves on the Hunt seeks to fill these gaps in our knowledge and understanding Combining behavioral data thousands of hours of original field observations research in the literature a wealth of illustrations and in the e book edition and online video segments from cinematographer Robert K Landis the authors create a compelling and complex picture of these hunters The wolf is indeed an adept killer able to take down prey much larger than itself While adapted to hunt primarily hoofed animals a wolf or especially a pack of wolves can kill individuals of just about any species But even as wolves help drive the underlying rhythms of the ecosystems they inhabit their evolutionary prowess comes at a cost wolves spend one third of their time hunting the most time consuming of all wolf activities and success at the hunt only comes through traveling long distances persisting in the face of regular failure detecting and taking advantage of deficiencies in the physical condition of individual prey and through

ceaseless trial and error all while risking injury or death By describing and analyzing the behaviors wolves use to hunt and kill various wild prey including deer moose caribou elk Dall sheep mountain goats bison musk oxen arctic hares beavers and others Wolves on the Hunt provides a revelatory portrait of one of nature's greatest hunters *The Incredible Travel Tales of John Muir (Illustrated Edition)* John Muir, 2017-07-04 During his numerous travels across the North America John Muir left behind a several travel books and travel reports In September 1867 Muir undertook a walk of about 1 000 miles from Indiana to Florida which he recounted in his book A Thousand Mile Walk to the Gulf He had no specific route chosen except to go by the wildest leafiest and least trodden way I could find Upon coming to California Muir immediately left for a visit to Yosemite a place he had only read about His hiking journeys through the mountains valleys forests and glaciers of Sierra are vividly described in books My First Summer in the Sierra and The Mountains of California Muir also made four trips to Alaska and he documented these experiences in books Travels in Alaska and The Cruise of the Corwin Steep Trails is collection of Muir's papers written during his journey over a period of twenty nine years collected by William Frederic Bad Table of Contents A Thousand Mile Walk to the Gulf My First Summer in the Sierra The Mountains of California Travels in Alaska The Cruise of the Corwin Steep Trails John Muir 1838 1914 was a Scottish American naturalist author environmental philosopher and early advocate of preservation of wilderness in the United States His letters essays and books telling of his adventures in nature especially in the Sierra Nevada mountains of California have been read by millions His activism helped to preserve the Yosemite Valley Sequoia National Park and other wilderness areas The Sierra Club which he founded is a prominent American conservation organization **Pennsylvania Fireside Tales** Jeffrey R.
