Mainframe Computer Systems Stephen H. Kaisler, 2020-10-22 This volume describes General Electric Corporation s venture into developing second and third generation mainframe computer systems The General Electric Corporation GE which began its life as the Edison Electric Co was long involved in electrical appliances and industrial machines It was also a founder of the Radio Corporation of America which eventually became one of its competitors and developed many electrical systems in order to control different types of industrial machines Its breakthrough into computing came with its winning bid to provide the computing systems for the Electronic Recording Method of Accounting system developed for the Bank of America by the Stanford Research Institute

The success of this project led GE to develop the GE 200 series which was the foundation for commercial timesharing. The GE 235 was selected by Dartmouth for its Dartmouth Time Sharing System (DTSS), an innovative academic time sharing system. BASIC was developed on the GE 235 computer system under DTSS. GE enhanced it to develop its Mark II/III Time Sharing System, apparently the first commercial time sharing service in the world. GE developed the GE 300/400 systems for industrial process control. The GE 600 series replaced the GE 200 series and demonstrated innovation in time sharing systems. The GE 645 was selected to host Multics, which was developed by MIT. However, GE felt that it could not compete in computing against IBM Univac and other mainframes competitors, so it folded its tent and sold its Computer Division to Honeywell Inc. Nevertheless, GE will be remembered for many innovations which continue to be used in modern computing systems. *The Game* Tom Wood, 2013-11-05. **OPENING MOVE** After executing a hit on a fellow assassin in Algiers, Victor, the world's deadliest hit man, is contracted by the CIA for an assignment that will take him across Europe to the blood-stained streets of Rome and straight into hell. **COUNTER MOVE** Victor must pose as his previous and very much dead target to figure out who the killer's next victim was going to be. But what was supposed to be a quick operation soon becomes much more complicated and treacherous. **FINAL MOVE** Forced to work with a group of ruthless mercenaries, Victor will face a choice he would rather not make: do the right thing or sacrifice the only thing in the world he truly cares about: his own life. **Expanding and Networking Microcomputers** Dennis Longley, Michael Shain, 1985-06-18. **PC Mag**, 1987-11-10. More than 30 years after its 1985 release on the Nintendo Entertainment System, *Super Mario Bros.* continues to be one of the best-selling video games of all time. For many, completing the classic side-scrolling platformer remains challenging enough to provide many hours of entertainment. In late 2016, an American gamer known online as darbian completed the game in record time, rescuing Princess Peach in 4 minutes 56 seconds. darbian practices speedrunning, a method of play in which quick reflexes and intimate familiarity with games are used to complete them in the fastest possible time. Through 10 interviews with darbian and other elite speedrunners, this book explores the history and techniques of this intense and competitive type of gaming.
