 Sir Norman Lockyer,1912 *The Status of Soviet Civil Science* Craig Sinclair,2012-12-06 This volume represents one
 outcome of the initiatives taken from time to time by the NATO Science Committee to add to the work of supporting civil
 science within the Alliance by mounting open meetings or other projects dealing with some topical aspect of science and
 technology policy Past examples have included the 20th anniversary meeting of the establish ment of the Science Committee
 in 1978 which made a review of the achieve ments of the various programmes It proved to be a valuable opportunity to take
 stock of the impact of science and technology on Western societies and was a particularly useful occasion for a critical
 analysis of the changing nature and social role of science and technology In contrast the Science Committee Conferences in
 1973 and 1976 on the Technology of Efficient Energy Utilization and on Thermal Energy Storage were responses of the
 Committee to specific technological problems engendered by the then acute energy supply position A similar technologically
 oriented study was made in 1975 of the Rational Use of Potentially Scarce Metals These initiatives were the counterpoint to
 the bulk of the continuing work of the Committee in funding scientific mobility in the Alliance as support to civil science This
 latter is done competitively in response to unsolicited applications The Committee hopes to demon strate by its special
 activities its flexibility and responsiveness to the evolving activities technologists and policy makers *Educational Times*
