The STEREO Mission C.T. Russell, 2008-07-18 C T Russell Originally published in the journal Space Science Reviews Volume 136 Nos 1 4 DOI 10 1007 s11214 008 9344 1 Springer Science Business Media B V 2008 The Sun Earth Connection is now an accepted fact It has a significant impact on our daily lives and its underpinnings are being pursued vigorously with missions such as the Solar TERrestrial RELations Observatory commonly known as STEREO This was not always so It was not until the middle of the nineteenth century that Edward Sabine connected the 11 year geomagnetic cycle with Heinrich Schwabe's deduction of a like periodicity in the sunspot record The clincher for many was Richard Carrington's sighting of a great white light on the Sun on September 1 1859 followed by a great geomagnetic storm 18 hours later But was the Sun Earth Connection significant to terrestrial denizens Perhaps in 1859 it was not but a century later it became so Beginning in the 1930s as electrical powergrids grew in size power companies began to realize that they occasionally had power blackouts during periods of intense geomagnetic activity This correlation did not appear to be sufficiently significant to bring to the attention of the public but during the International Geophysical Year IGY when geomagnetic activity was being scrutinized intensely the occurrence of a large North American power blackout during a great magnetic storm was impossible to ignore
