LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards into categories. What criteria did you use to select your groups?

My criteria were size, color, and shape of the lizards.

Did your criteria yield similar lizard types?

Yes, because the criteria were similar, the lizards were similar. I used size, color, and shape to select my lizards. I found that the lizards were similar in size, color, and shape.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the lizard group.

The adaptation of the lizard group is the color of the lizards. The color of the lizards is a adaptation because it helps the lizards to blend in with their environment and avoid being eaten.

Provide one evolutionary explanation for why diversifying in this lizard group's eating habits (i.e., the group) would have resulted in speciation.

One evolutionary explanation for why diversifying in this lizard group's eating habits would have resulted in speciation is that the lizards would have different adaptations for eating different types of food.
