Standardization is one of the defining aspects of modern life its presence so pervasive that it is usually taken for granted However cumbersome onerous or simply puzzling certain standards may be their fundamental purpose in streamlining procedures regulating behaviors and predicting results is rarely questioned Indeed the invisibility of infrastructure and the imperative of standardizing processes signify their absolute necessity Increasingly however social scientists are beginning to examine the origins and effects of the standards that underpin the technology and practices of everyday life Standards and Their Stories explores how we interact with the network of standards that shape our lives in ways both obvious and invisible The main chapters analyze standardization in biomedical research government bureaucracies the insurance industry labor markets and computer technology providing detailed accounts of the invention of standard humans for medical testing and life insurance actuarial tables the imposition of chronological age as a biographical determinant the accepted means of determining labor productivity the creation of international standards for the preservation and access of metadata and the global consequences of ASCII imperialism and the use of English as the lingua franca of the Internet Accompanying these in depth critiques are a series of examples that depict an almost infinite variety of standards from the controversies surrounding the European Union s supposed regulation of banana curvature to the minimum health requirements for immigrants at Ellis Island conflicting and ever increasing food portion sizes and the impact of standardized punishment metrics like Three Strikes laws The volume begins with a pioneering essay from Susan Leigh Star and Martha Lampland on the nature of standards in everyday life that brings together strands from the several fields represented in the book In an appendix the editors provide a guide for teaching courses in this emerging interdisciplinary field which they term

infrastructure studies making *Standards and Their Stories* ideal for scholars students and those curious about why coffins are becoming wider for instance or why the Financial Accounting Standards Board refused to classify September 11 as an extraordinary event *Feeding New Orleans* Jeanne K. Firth,2023-11-15 After Hurricane Katrina in 2005 many high profile chefs in New Orleans pledged to help their city rebound from the flooding Several formed their own charitable organizations including the John Besh Foundation to help revitalize the region and its restaurant scene A year and a half after the disaster when the total number of open restaurants eclipsed the pre Katrina count it was embraced as a sign that the city itself had survived and these chefs arguably became the de facto heroes of the city s recovery Meanwhile food justice organizations tried to tap into the city s legendary food culture to fundraise marketing high end dining events that centered these celebrity chefs Jeanne K Firth documents the growth of celebrity humanitarianism viewing the phenomenon through the lens of feminist ethnography to understand how elite philanthropy is raced classed and gendered Firth finds that cultures of sexism in the restaurant industry also infuse chef led philanthropic initiatives As she examines this particular flavor of elite celebrity based philanthropy Firth illuminates the troubled relationships between consumerism food justice movements and public private partnerships in development and humanitarian aid **Associated Press Coverage of a Major Disaster** Thomas Fensch,2015-07-16 Originally published in 1989 This diary of a news event looks at how the reporting happened as spread by the news wire system of the Associated Press service in America Analysing the flow of information in this detailed way this book presents how a major disaster a fast moving story with considerable spin was fed out to the press via the Dallas bureau in 1988 Introductory chapters outline the workings of a press bureau office during a major story and present interview sections with key reporters on the story about how their role unfolded Sidebar commentary alongside the reproductions of the news wires organised by date and time adds interesting discussion throughout the book while a conclusion evaluates the coverage of the story The Appendices include reproductions of Texas newspapers resulting pages about the crash This is a fascinating case study of the dissemination of news date before the internet compiled at a time when computers were just large enough to retain in memory all stories relating to event X in order for this kind of analysis to be attempted
