Medical Books and Serials in Print, 1979 R. R. Bowker LLC, 1979-05 Griffiths III - A Case Study Book for Practitioners Louise Stroud, Elizabeth Green, 2022-07-11. Written by world-renowned practitioners of the Griffiths Scales of Child Development, Third Edition, Griffiths III, this volume presents individual case studies to assist practitioners and trainees in making full use of the Griffiths III to comprehensively assess a child's development. Practitioners will learn about tracking and monitoring development and how to measure the impact of intervention, creating more informed decisions about the management and placement of the child. Two introductory chapters examine the Griffiths III as a child development assessment tool, looking in detail at its psychometric properties and how to use the test to interpret, plan, and understand a child's performance, as well as the child's strengths and challenges. Grouped according to five color zones for ease of reading, 15 case studies are presented for children with a wide range of abilities and from 10 different countries. The book is based on four conceptual frameworks: the ICF, CY ESSENCE, the link between function and intervention, and Ruth Griffith's Avenues of Learning theory. Throughout, the perspective of the child is placed at the center, and their voices are included in the plans described. Key concepts, points of importance, and questions for the reader are included at the end of each chapter. The book is aimed at practitioners of the Griffiths III, but it is also of interest to a wider range of developmental practitioners, including child psychologists, child psychiatrists, pediatricians, and child psychotherapists.
