semantic avor but still mostly based on or at least linked to Shannon s theory Approaches to semantic informationtheoryalsoveryoftenmakeuseofformallogic Thereby information is linked to reasoning deduction and inference as well as to decision making Further entropy and related measure were soon found to have important connotations with regard to statistical inference Surely statistical data and observation represent information information about unknown hidden parameters Thus a whole branch of statistics developed around concepts of Shannon s information theory or derived from them Also some proper measurements propriate for statistics like Fisher s information were proposed *Chilton's Repair & Tune-up Guide* Chilton Book Company,1984
