Fuels and Lubricants Handbook , Energy Resources and Systems Tushar Ghosh, Mark Prelas, 2009-06-17 In the lifetimes of the authors the world and especially the United States have received three significant wake up calls on energy production and consumption The first of these occurred on October 15 1973 when the Yom Kippur War began with an attack by Syria and Egypt on Israel The United States and many western countries supported Israel Because of the western support of Israel several Arab oil exporting nations imposed an oil embargo on the west These nations withheld five million barrels of oil per day Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production per day extended through March of 1974 This represented 7% of the free world's i e excluding the USSR oil production In 1972 the price of crude oil was about 3 00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over 12 00 This resulted in one of the worst recessions in the post World War II era As a result there was a movement in the United States to become energy independent At that time the United States imported about one third of its oil about five million barrels per day After the embargo was lifted the world chose to ignore the wake up call and went on with business as usual Crude Oil Refining Marcio Wagner da Silva, 2022-10-04 This book provides an overview of crude oil refining processes and presents a deep analysis of the current context and challenges imposed on players in the downstream industry Crude Oil Refining A Simplified Approach covers traditional processes of the refining industry the impact of current trends and technological routes available to help these players survive in a highly competitive environment FEATURES Offers a simplified approach to crude oil refining processes Discusses economic information related to the downstream business including refining margins and profitability Introduces newer trends in the industry such as petrochemical integration crude to chemicals refineries and renewables coprocessing in crude oil refineries Presents the challenges related to these new trends and offers technological solutions to overcome them for profitable and sustainable operations Describes how the use of biofuels can minimize the environmental impact of transportation fuel in nations of high demand like Brazil Offering a contemporary view of current challenges and opportunities in the downstream oil and gas business this practical book is aimed at readers working in the fields of petroleum and chemical engineering **Petroleum Refining.  methods wherever possible      *Energy Resources and Systems* Tushar K. Ghosh, Mark A. Prelas, 2009-06-04 In the lifetimes  
 of the authors the world and especially the United States have received three significant wake up calls on energy production  
 and consumption The first of these occurred on October 15 1973 when the Yom Kippur War began with an attack by Syria  
 and Egypt on Israel The United States and many western countries supported Israel Because of the western support of Israel  
 several Arab oil exporting nations imposed an oil embargo on the west These nations withheld five million barrels of oil per  
 day Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production  
 per day extended through March of 1974 This represented 7% of the free world's i.e. excluding the USSR oil production In  
 1972 the price of crude oil was about 3.00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over  
 12.00 This resulted in one of the worst recessions in the post World War II era As a result there was a movement in the  
 United States to become energy independent At that time the United States imported about one third of its oil about five  
 million barrels per day After the embargo was lifted the world chose to ignore the wake up call and went on with business as  
 usual      **Petroleum Refining Design and Applications Handbook, Volume 3** A. Kayode Coker, 2022-06-21
