into the vibrant and intriguing world of mathematics education Teaching Mathematics in Grades 6 12 explores how research
in mathematics education can inform teaching practice in grades 6 12 The author shows secondary mathematics teachers the
value of being a researcher in the classroom by constantly experimenting with methods for developing students mathematical
thinking and then connecting this research to practices that enhance students understanding of the material The chapters in
Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and
learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and
describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a
deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how
students thinking may develop in response to different teaching strategies **The Mathematics Teacher** ,1924
