3 Macintosh Software Setup

Once you have completed the Hardware Installation, the Mac OS will display an unformatted volume. This is your new drive.

Note: It may take a few minutes for your drive to mount.

Maxtor suggests that you re-format your drive for optimal performance on the Macintosh OS 9 and OS X.

Formatting Your Drive for Mac OS

Formatting the drive destroys all data contained on that drive. Make a backup copy of all your data before formatting your drive.

To format the drive for Mac OS 9

1. Disable the **File Exchange** control panel.
 - a. From the Apple () menu, select **Control Panels → Extensions Manager**.

- b. From the list that appears, clear the check box next to the **File Exchange** control panel.
 - c. Click **Restart**.

As the computer restarts, a message appears saying the **drive is unreadable** and asks you to initialize the drive.

For further information on your drive's capacity, see the description titled "My computer shows less drive capacity than on the drive box label" in section 4.

2. Enter a name for the drive in the **Name** field.
3. Select **Mac OS Extended** from the **Format** menu and click **Initialize**.

You will receive an Alert: "Initializing will erase all information on your drive." Click **Continue**.

The new drive appears on your desktop as a Macintosh drive with the name you assigned.

To confirm the drive is formatted properly, select the drive and then select **File → Get Info → General Information**. The drive format should read **Mac OS Extended**.

4. Enable the **File Exchange** control panel.
 - a. From the **Apple** menu, select **Control Panels → Extensions Manager**.
 - b. Select the check box next to the **File Exchange** control panel.
