The Competitive Effects of

Minority Shareholdings Panagiotis Fotis, Nikolaos Zevgolis, 2016-04-07 The objective of this book is twofold First it presents the economics of minority shareholdings under both merger and antitrust law In particular economic analysis provides both an overall assessment of minority shareholdings in the context of concentrations and Articles 101 and 102 TFEU and the examination of the link between non controlling minority shareholdings merger control and antitrust law Second the book also provides a legal assessment and an analysis of selected case law According to settled European case law minority shareholdings are analysed not only under Regulation 139 2004 but also under Articles 101 and 102 TFEU Nevertheless according to current enforcement practice at European and international levels several national competition authorities have adopted different approaches The million dollar question is whether the existing regulatory framework is sufficient to cover all possible cases In summary the book will be a useful tool for students practitioners researchers economic and legal experts and competition authorities It provides a comprehensive survey of the subject which has been missing until now and answers many questions that have been raised in the literature in the last decades

Private Sector Development in an Emerging World Diederik Boer, Harald Sander, Katharina Friz, Antonella Anastasi, 2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and case studies presented share common themes namely that the relative roles of state and private sector should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people
