Complementing Book 1 of the same title this text takes the student up to the City and Guilds full Craft Certificate level All aspects of the course are dealt with along with the associated scientific background mathematical calculations and drawings required Although prior knowledge of the subject as provided in Book 1 is assumed important principles are repeated so that this book can be read independently of the companion volume Extensively illustrated each chapter begins with clearly defined objectives and concludes with a series of questions and assignments The text will prove invaluable as a general workbook for those following advanced woodworking courses including CITB students and self employed carpenters joiner and builders It is useful supplementary reading for those taking courses in brickwork and cabinetmaking for trainee woodworking machinists and construction technicians as well as for students of City and Guilds Foundation courses *American Lumberman*, 1922

Dougong Alexandra Harrer, 2025-07-31 This is the first English language study devoted to dougong the block bracket cluster widely regarded as the epitome of traditional Chinese architecture For almost two millennia dougong have been central to the multipartite frame structure of wooden buildings connecting columns with beams supporting projecting eaves and providing resistance to earthquake damage They have enabled and required builders to ensure both the functionality and the moral dimension of their designs through the thoughtful use of appropriately graded timbers and corresponding methods of modular design that determine the size and quality of a building in keeping with the social standing of its owner Richly illustrated with original high quality photographs and drawings this book explores the engaging story of dougong as technical artifacts that embody Chinese culture Alexandra Harrer delves into the previously unresolved relationship between standard dougong and their regional and local variations in the rhetoric of Chinese construction offering an alternative to sociopolitical caste as a means of interpreting these differences She untangles the lengthy selection process and trial and error development of the block bracket cluster before codification to reveal how design idiosyncrasies derived from an unlikely combination of legal codes and ethical imperatives For example dougong with arms projecting at a 45 or 60 degree angle from the wall plane long dismissed as unorthodox are shown to be a subtle design expression that yields to authority while it seeks to exploit archaic cultural standards Harrer argues that the ethical dimensions of graphic shapes and the culturally charged space that dougong occupy are key to understanding this creative process
