geoENV II — Geostatistics for Environmental Applications Jaime Gómez-Hernández, A.O. Soares, Roland Froidevaux, 1999-06-30 This book contains selected contributions from the geoENV98 the Second European Conference on Geostatistics for Environmental Sciences held in Valencia Spain in November 1998 This second book of the geoENV series illustrates the developments on geostatistics as applied to the environmental sciences which have occurred during the past two years It also presents practical applications which will be of interest to both researchers and practitioners The book starts with three keynote papers on ecology climatology and soil science followed by forty three contributions The contents of the book are eminently practical The objective of the editors was to compile a set of papers in which the reader could perceive how geostatistics is applied within the environmental sciences A few selected theoretical contributions are also included The papers are organized in the following seven main areas Air pollution Climatology Ecology Hydrogeology Soil

Science Theory Other applications presenting applications varying from particle matter analysis noise exposure sampling space time modeling of ozone levels downscaling of precipitation kriging with categorical external drift analysis of fish abundance combining variograms and radio telemetry in ecology kriging radionuclide deposition mapping of soil contamination network design for soil monitoring inverse modeling in hydrogeology groundwater transport modeling coastal evolution mapping to spatial modeling of cancer ratios Audience This publication will be of great interest and practical value to geostatisticians working both in academia and in industry

Energy, Waste and the Environment R. Gieré, Peter Stille, 2004 This book provides incentives for further development of sustainable fuel cycles through a novel and interdisciplinary approach to an Earth science related topic The main focus is on geochemical concepts in immobilizing isolating or neutralizing waste derived from energy production and consumption The book also addresses the issue of using some types of energy derived waste as alternative raw materials Moreover it highlights research on how certain wastes can be used for energy production an increasingly important aspect of modern integrated waste management strategies The main objectives are to a identify the most serious environmental problems related to various types of power generation and associated waste accumulation b present strategies based on natural analogue materials for the immobilization of toxic and radioactive waste components through mineralogical barriers c discuss modern procedures for reuse of waste or certain waste components and d review the importance of geochemical modelling in describing and predicting the interaction between waste and the environment

Unsaturated Soil Mechanics - from Theory to Practice Zhenghan Chen, Changfu Wei, De'an Sun, Xongfu Xu, 2015-10-14 In the past decades advances have been made in the research and practice on unsaturated soil mechanics In 2000 the first Asia Pacific Conferences on Unsaturated Soils was organized in Singapore Since then four conferences have been held under the continued support of the Technical Committee on Unsaturated Soils TC106 of the International Socie

The Filmmaker's Handbook Steven Ascher, Edward Pincus, 2007 A fully revised comprehensive guide offers an in depth exploration of today s recent technological advances such as digital age filmmaking while reviewing a collection of new methods and techniques in relation to various film formats and offering suggestions on the business aspects of financing and producing films Original

High Level Radioactive Waste (HLW) Disposal R. Pusch, R. Yong, M. Nakano, 2011-10-17 High Level Radioactive Waste HLW Disposal A Global Challenge presents the most recent information on proposed methods of disposal for the most dangerous radioactive waste and for assessing their function from short and long term perspectives It discusses new aspects of the disposal of such waste especially HLW The book is unique in the literature in making it clear that due to tectonics and long term changes in rock structure rock can serve only as a mechanical support to the chemical apparatus and that effective containment of hazardous elements can only be managed by properly designed and manufactured containers canisters This contradicts the common belief that the rock itself is an effective barrier to the transport of contaminants like radionuclides The importance of the longevity of the containers

becomes clear and requires a consideration of all degrading physical chemical processes which occupies a considerable part of the book The book is thus an important contribution to the literature because it proposes design principles that can make repositories for HLW radioactive waste much safer
