## **God Value And Nature:**

*God, Value, and Nature* Fiona Ellis, 2014 This book takes on board the assumption that we should be naturalists and argues that the position can accommodate the idea of God Naturalism and theism are no longer logically incompatible and the fashionable atheism of our times is shown to depend upon an unwarranted commitment to scientism and a questionable conception of God

**God, Value, and Nature** Fiona Ellis, 2014 Many philosophers believe that God has been put to rest Naturalism is the default position and the naturalist can explain what needs to be explained without recourse to God This book agrees that we should be naturalists but it rejects the more prevalent scientific naturalism in favour of an expansive naturalism inspired by David Wiggins and John McDowell It is argued that expansive naturalism can accommodate the idea of God and that the expansive naturalist has unwittingly paved the way towards a form of naturalism which poses a genuine challenge to the atheist It follows that the traditional naturalism versus theism debate must be reconfigured naturalism and theism are no longer logically incompatible rather they can both be true 0Fiona Ellis draws on a wide range of thinkers from theology and philosophy and spans the gulf between analytic and continental philosophy She tackles various philosophical problems including the limits of nature and the status of value some theological problems surrounding the natural supernatural relation the Incarnation and the concept of myth and offers a model inspired by the secular expansive naturalist s conception of philosophy to comprehend the relation between philosophy and theology

**Nature, Value, Duty** Christopher J. Preston, Wayne Ouderkirk, 2006-11-17 Gifford Lecturer and Templeton Prize winner Holmes Rolston III is widely known as the father of environmental ethics His writings range between natural philosophy and theology and include detailed presentations of an interlocking position that includes aesthetics value theory natural resource policy wilderness advocacy and sustainable development *Nature Value and Duty* Life on Earth with Holmes Rolston III is a collection of contemporary writings on the work of Holmes Rolston III The authors contributing to this volume are a mixture of senior scholars in environmental ethics and new voices in philosophy and in literature Together they provide an in depth evaluation of many of the topics discussed by Rolston They probe the strengths and weaknesses of his work and suggest valuable correctives Rolston himself in a detailed reply to each of his critics at the end of the volume reveals where some of these criticisms sting him the most and in the process provides one of the most detailed and articulate defenses of his position ever offered

**The Intrinsic Value of Nature** Leena Vilkkka, 2021-11-15 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkka develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkka analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of

weak anthropocentrism that denies the existence of naturogenic values In Vilkkas theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkas analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography

*The Human Relationship to Nature* Matthew R. Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time

*The Nature of Environmental Stewardship* Johnny Wei-Bing Lin, 2016-02-08 Environmental issues appear deceptively simple science tells us what the problems are and how to solve them and for Christians the Bible motivates us to care for creation And yet both in society in general as well as in the Christian church in particular we cannot seem to agree on what to do regarding environmental issues In this book climate scientist Johnny Wei Bing Lin argues that determining the content of environmental stewardship far from being a straightforward exercise is a difficult and complex endeavor He sets forth a general taxonomy drawing from worldviews ethical theories science epistemology science policy studies politics and economics that can help us better understand what excellent creation care consists of and how to bridge the differences people have regarding environmental issues
