sections are then connected through discussions of the relationship of size and shape adaptations distribution patterns behavior and diversity of life Since the emphasis is on patterns rather than individual species each chapter has cross references to related topics For example tree related topics such as leaf shape treelines and fall colors are all discussed in different chapters even though they are related Leaf shape is associated with trees as organisms and therefore is in Chapter 2 Trees treelines are most associated with mountains so their description is in Chapter 8 Mountains fall colors apply more broadly to forests than to individual trees and they are discussed in Chapter 9 Forests Approximately 500 color photographs help make the more than 200 patterns apparent and recognizable for readers and each pattern is accompanied by a detailed description and a brief list of sources The book is designed to invite browsing and readers will gain a rich ecological perspective and insight Curiosity about the world around us is a basis for human learning The Nature Handbook serves to aid all nature lovers in their quest for understanding the many stories that our living world provides **The Golden Guide to South and East Asia** Daniel Wolfstone, 1969
