## PRO TIPS

### #1: Enable the Grid

The grid helps you frame the shot using the rule of thirds.

Generally, for a good composition, you should try to place the subject on one of the four intersection points.

### #2: Disable Hypersmooth in Low-Light

In Low-Light conditions, the GoPro built-in Electronic Image Stabilization creates video artifacts, resulting in a poor image quality.

Disable Hypersmooth for a cleaner image in low-light.
