Teacher Quality and Education Policy in India Preeti Kumar,Alexander W. Wiseman,2021-03-31 By drawing on quantitative data and qualitative analyses of five major national education policies implemented in India over the last 15 years this comprehensive volume explores their impact on teacher quality and perceived effectiveness explaining how this relates to variations in student performance Responding to a national agenda to increase the quality of the Indian teacher workforce Teacher Quality and Education Policy in India critically questions the application of human capital theory to Indian education policy Chapters provide in depth and strategically structured analyses of five national policies including the recently approved National Education Policy NEP 2020 to see how Indian policymakers use teacher quality as a driver and measurement of education and national economic development Ultimately the text offers evidence based policy recommendations to improve teacher quality in India suggesting that while all five policies have contributed significant frameworks and recommendations for teacher quality reform they have failed to move beyond a symbolic function Given its rigorous methodological approach this book will be a valuable addition to the under researched question of education policymaking in postcolonial contexts It will be an indispensable resource not only for scholars working on policymaking in the Indian context but also for those working at the intersection of education teacher development and policymaking in developing countries

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The

problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual. Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding. The current status of Ofqual as an independent regulator accountable to Parliament is the right one. However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do.

OECD Reviews of Evaluation and Assessment in Education: Serbia Maghnouj Soumaya, Salinas Daniel, Kitchen Hannah, Guthrie Caitlyn, Bethell George, Fordham Elizabeth, 2020-03-20. This review developed in cooperation with UNICEF provides Serbia with recommendations to help strengthen its evaluation and assessment system to focus on support for student learning. It will be of interest to Serbia as well as other countries looking to make more effective use of their evaluation and assessment system to improve quality and equity and result in better outcomes for all students.

Slow Burn R. Jisung Park, 2025-07-29. How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today. It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe. In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now. Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs. When wildfires blaze what happens to people downwind of the smoke. When natural disasters destroy buildings and bridges what happens to educational outcomes. Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility. By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality. Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not. Viewing climate change as a slow and unequal burn comes with an important silver lining. It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects. We can begin to overcome our climate anxiety. Park shows us when we begin to tackle these problems locally.
