How to Grade for Learning Ken O'Connor, 2017-10-04 Implement standards based grading practices that help students succeed Classroom assessment and grading should help students grow and develop to their full potential but meshing traditional grading practices with students achievement on standards has been difficult and daunting Making real and lasting changes to grading practices requires both knowledge and willpower This 4th edition of the best selling *How to Grade for Learning* provides eight guidelines for good grading offers recommendations for practical applications and gives solid suggestions for implementing more effective grading practices Ken O'Connor presents the latest research on motivation mindset learning styles and beliefs about fairness to inform this new edition which includes Both the why's and the how to's of implementing standards based grading practices 48 educator contributions from nationally and internationally known educators authors and consultants that provide ideas and testimonials for effective assessment practices Sections on hot button issues such as academic dishonesty extra credit bonus points and homework Additional information on utilizing levels of proficiency and eliminating the use of percentages and averaging Reflective exercises and numerous tools including rubrics sample letters and case studies Techniques for managing grading more efficiently An invaluable resource for helping teachers assign grades that are accurate consistent meaningful and supportive of learning this book also makes an ideal staff development resource *Threshold Concepts in Practice* Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 *Threshold Concepts in Practice* brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts

Framework In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal Learners enter new conceptual and often affective territory Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view These conceptual gateways are integrative exposing the previously hidden interrelatedness of ideas and are irreversible However they frequently present troublesome knowledge and are often points at which students become stuck Difficulty in understanding may leave the learner in a liminal state of transition a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry Learners navigating such spaces report a sense of uncertainty ambiguity paradox anxiety even chaos The liminal space may equally be one of awe and wonderment Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods These spaces require not only conceptual but ontological and discursive shifts This volume the fourth in a tetralogy on Threshold Concepts discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine law engineering architecture and military education Cover image Detail from Eve offering the apple to Adam in the Garden of Eden and the serpent c 1520 25 Lucas Cranach the Elder 1472 1553 Bridgeman Images All rights reserved
