X-kit FET Grade 12 ECONOMICS Caryl Greyling, 2007 Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-21 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Socio-economic Rights in South Africa Danie Brand, Christof H. Heyns, 2005 The Experience of Economic Redistribution Clarence Tshitereke, 2006-10-09 This book provides an analysis of the country's political economy in transition. It documents the history of the gold mining industry's involvement in shaping the political landscape of South Africa and shows the degree to which the political transition was induced to put in place a new mode of regulation for capital accumulation. In the process, the victims of apartheid have now become victims of democracy's neo-liberalism as the government is constrained from being developmental interventionist and redistributive.

Twenty Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe, Martin Prew, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014. An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things, whether it be about policy resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

contributions of the inputs of the school the household and the individual learner to educational outputs is not straightforward particularly since very little educational production function analysis has been undertaken in South Africa Until recently no South African school data has incorporated test results school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis However the results from a survey of a sample of schools involved in the large scale Quality Learning Project QLP funded by the Business Trust have yielded such data The QLP data set offers a new analytical opportunity to address the question What are the effects of social and economic variables on educational outcomes in the QLP schools **Drum** ,2007 **Innovative Production And Construction:**
