meanings of these terms derive from the social domain in which they are being used This extends and develops a conception of how language intervenes in the task of mathematics education presented elsewhere Brown 2001 In this present book however we have a particular focus on trainee and newly qualified teachers with a view to pinpointing how this conception of mathematics manifests itself in their evolving practices We question how such teachers with many years of experience as a pupil in school might now re orient themselves towards the demands of teaching mathematics in schools
