Nilson,2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel4 Fosters Higher Order Cognitive Development and Creativity5 Discourages Cheating6 Reduces Student Stress7 Makes Students Feel Responsible for Their Grades8 Minimizes Conflict Between Faculty and Students9 Saves Faculty Time and Is Simple to Administer10 Makes Expectations Clear and Simplifies Feedback for Improvement11 Assesses Authentically12 Achieves High Inter Rater Agreement *Multiphysics and Multiscale Building Physics* Umberto Berardi,2024-12-18 This book contains selected papers presented at the 9th edition of

the official triennial conference of the International Association of Building Physics IABP held in Toronto Ontario Canada on 25-27 July 2024. The contents make valuable contributions to academic researchers and practitioners of the building sector. Readers will encounter new ideas for realizing more efficient and resilient buildings and cities. The approach followed in the book aims to explore how building physics can be explored using multi domains and scales. **Teaching Reading**

Comprehension to English Learners in Secondary Schools: A Research-Based Approach Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23. Teaching reading comprehension to English learners (ELs) in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school. **Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach** explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies, and teacher training and is a useful resource for academicians, researchers, and scientists. **The**

End of Public Schools David W. Hursh, 2015-10-16. *The End of Public Schools* analyzes the effect of foundations, corporations, and non-governmental organizations on the rise of neoliberal principles in public education. By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians, it describes how specific policies that limit public control are advanced across all levels. Informed by a thorough understanding of issues such as standardized testing, teacher tenure, and charter schools, David Hursh provides a political and pedagogical critique of the current school reform movement as well as details about the increasing resistance efforts on the part of parents, teachers, and the general public. **Great Teachers** Great Britain. Parliament. House of Commons. Education Committee, 2012. Additional written evidence is contained in Volume 3 available on the Committee website at www.parliament.uk/education-committee. **Testing Regimes, Accountabilities and Education Policy** Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02. Around the globe, various kinds of testing, including high-stakes national census testing, have become meta-policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning.

and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation's human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy
