Powering Science National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio,2018-01-29 NASA s Science Mission Directorate SMD currently operates over five dozen missions with approximately two dozen additional missions in development These missions span the scientific fields associated with SMD s four divisions Astrophysics Earth Science Heliophysics and Planetary Sciences Because a single mission can consist of multiple spacecraft NASA SMD is responsible for nearly 100 operational spacecraft The most high profile of these are the large strategic missions often referred to as flagships Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget technology and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs It considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly balanced program containing a range of mission classes

Pursuing quality education in Physical and Rehabilitation Medicine Francesca Gimigliano,Maria Gabriella Ceravolo,Jorge Lains,2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care International bodies like the UEMS Board for Physical and Rehabilitation Medicine PRM or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education The implementation of such rules is to be validated worldwide with special attention to low and middle income countries This Research Topic aims to stimulate awareness in the scientific community especially for those involved in postgraduate education and policy making decisions It will highlight the need for developing competency based education as a powerful mechanism to align education and training with health system priorities This holds particular value for resource

limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population's health profile but also the strengths and weaknesses e.g. workforce gaps and maldistributions of the health system. This goal can be achieved through sharing experiences between those who have engaged themselves in the process of program development, curriculum design and competency based education in rehabilitation. Over the last 25 years the number of papers addressing the issue of residency education in PRM has exponentially increased, testifying the interest towards the role of rehabilitation and more specifically of the PRM doctors as leaders of the rehabilitation team.

A History of Civilization in 50 Disasters
Gale Eaton, 2016-01-04 2016 IBPA Benjamin Franklin Silver Award Winner

The earth shakes and cracks open. Volcanoes erupt. Continents freeze, bake and flood. Droughts parch the land. Wildfires and hundred year storms consume anything in their paths. Invisible clouds of disease and pestilence probe for victims. Tidal waves sweep ashore from the vast sea. The natural world is a dangerous place but one species has evolved a unique defense against the hazards: civilization. Civilization rearranges nature for human convenience. Clothes and houses keep us warm, agriculture feeds us, medicine fights our diseases. It all works most of the time. But key resources lie in the most hazardous places so we choose to live on river flood plains, on the slopes of volcanoes, at the edge of the sea, above seismic faults. We pack ourselves into cities, Petri dishes for germs. Civilization thrives on the edge of disaster. And what happens when natural forces meet molasses, holding tanks, insecticides, deepwater oil rigs, nuclear power plants? We learn the hard way how to avoid the last disaster and maybe how to create the next one. What we don't know can indeed hurt us. This book's white knuckled journey from antiquity to the present leads us to wonder at times how humankind has survived. And yet, as Author Gale Eaton makes clear, civilization has advanced not just in spite of disasters but in part because of them. Hats off to human resilience, ingenuity and perseverance. They've carried us this far, may they continue to do so into our ever hazardous future.

The History in 50 series explores history by telling thematically linked stories. Each book includes 50 illustrated narrative accounts of people and events, some well known, others often overlooked, that together build a rich connect-the-dots mosaic and challenge conventional assumptions about how history unfolds. Dedicated to the premise that history is the greatest story ever told, it includes a mix of greatest hits with quirky, surprising, provocative accounts. Challenges readers to think and engage. Includes a glossary of technical terms, sources by chapter, teaching resources as jumping off points for student research, and endnotes.

An innovative internationally developed system to help advance science learning and instruction for high school students. This book tells the story of a 3.6 million research project funded by the National Science Foundation aimed at increasing scientific literacy and addressing global concerns of declining science engagement. Studying dozens of classrooms across the United States and Finland, this international team combines large scale studies with intensive interviews from teachers and students to examine how to transform science education. Written for teachers, parents, policymakers and researchers, this book offers solutions for

matching science learning and instruction with newly recommended twenty first century standards **Science Blogging**

Christie Wilcox, Bethany Brookshire, Jason G. Goldman, 2016-03-01 Here is the essential how to guide for communicating scientific research and discoveries online ideal for journalists researchers and public information officers looking to reach a wide lay audience Drawing on the cumulative experience of twenty seven of the greatest minds in scientific communication this invaluable handbook targets the specific questions and concerns of the scientific community offering help in a wide range of digital areas including blogging creating podcasts tweeting and more With step by step guidance and one stop expertise this is the book every scientist science writer and practitioner needs to approach the Wild West of the Web with knowledge and confidence *Decentralisation and Regional Development* Eva Dick, Karin Gaesing, Daniel Inkoom, Teodoro Kausel, 2016-06-15 This book analyzes decentralisation regional development paths and success factors in different

governance sectors in Ghana the Philippines Tanzania and Chile and discuss overarching aspects of relevance Decentralisation which refers to the delegation of administrative responsibilities political decision making and fiscal powers to lower levels of government is now considered one of the most efficient engines of development In Sub Saharan Africa decentralised states have made more progress in reducing poverty than those states with lower decentralisation scores But in many countries decentralisation is still considered a work in progress with unsatisfactory results From a spatial point of view the link between decentralisation and regional and district development is particularly interesting Both in the North and in the South regional or district development is seen as holding the potential for advancing social and economic development and even more so in decentralised political settings Space based networks at the regional or district level are considered instrumental for responding to locally specific challenges e g in areas lagging behind economically **Journal of the**

Physical Society of Japan, 2014 **Big Data, Algorithms and Food Safety** Salvatore Sapienza, 2022-10-20 This book identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of meaningful inferences from data However conflicting interests and tensions among the parties involved are hindering efforts to find shared methods for steering the processing of Big Data in a sound transparent and trustworthy way While consumers call for more transparency food business operators tend to be reluctant to share informational assets This has resulted in a considerable lack of trust in the EU food safety system A recent legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain While

this regulatory approach is being established breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning The book focuses on two core topics data ownership and data governance by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied significant and overlooked domain To do so it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union while also assuming an ethical perspective when exploring potential solutions The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act and the Artificial Intelligence Act

Neuroinflammation and Behaviour Luba Sominsky, Adam K. Walker, Deborah M. Hodgson, 2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system

such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives Manufactured Crisis James Simpson,2024-09-24 Few could have imagined ten years ago where we d be in America today We are confronted on all sides by interminable crises that threaten the very fabric of our nation from a border flooded with millions of migrants from all over the world to a fentanyl crisis killing more American youths every year than the past three wars combined Radical transgender activism and other cultural insanity has pushed more youths to commit suicide than at any other time in history It seems as though the world is rapidly coming unglued But it is actually a diabolical plan that has been operating for over a hundred years and is now showing its face This book describes this plan in excruciating detail and shows us a path out if we re willing to take it **Excellent Teaching** Bettina Jansen-Schulz,Till Tantau,2018-10-12 Die Frage wie die Lehre an Hochschulen zu Exzellenz verbessert werden kann beantworten die Autorinnen und Autoren des Sammelbands aus vier Perspektiven Sie betrachten Herausforderungen f r die Steuerung der Organisation Hochschule und diskutieren aktuelle Forschungsentwicklungen insbesondere anhand der Methode Scholarship of Teaching and Learning Au erdem werden gute Beispiele aus der Lehrpraxis pr sentiert und Ans tze vorgestellt um exzellente Lehre sichtbar zu machen Der Band richtet sich an Akteurinnen und Akteure aus der Lehr und Hochschulentwicklung Psychological variables, physical activity and physical education Víctor Arufe Giráldez,Rui Matos,Rubén Navarro-Patón,Alberto Sanmiguel-Rodríguez,2023-05-24
