Elephants are mammals and herbivores. They belong to a group called ungulates for a long time, with their long tusks and trunks. Another kind of elephant is the African elephant. Elephants have a natural fear of bees and will be used by farmers in Africa to keep bees away from their crops. Elephants have a natural memory and can remember things for a long time. Elephants are highly social animals, which are led by the oldest and largest male, called the matriarch. Elephants communicate with each other using sounds, such as trumpeting, rumbling, and growling. The trunk of an elephant has many uses. Elephants have a great sense of smell and can even smell the passing of time. They are surprisingly good swimmers. They use their trunks to drink water and can swim long distances.
