Big Data and High Performance Computing L. Grandinetti, G.R. Joubert, M. Kunze, 2015-10-20 Big Data has been much in the news in recent years and the advantages conferred by the collection and analysis of large datasets in fields such as marketing medicine and finance have led to claims that almost any real world problem could be solved if sufficient data were available This is of course a very simplistic view and the usefulness of collecting processing and storing large datasets must always be seen in terms of the communication processing and storage capabilities of the computing platforms available This book presents papers from the International Research Workshop Advanced High Performance Computing Systems held in Cetraro Italy in July 2014 The papers selected for publication here discuss fundamental aspects of the definition of Big Data as well as considerations from practice where complex datasets are collected processed and stored The concepts problems methodologies and solutions presented are of much more general applicability than may be suggested by the particular application areas considered As a result the book will be of interest to all those whose work involves the processing of very large data sets exascale computing and the emerging fields of data science

Sport Development in the United States Peter Smolianov, Dwight Zakus, Joseph Gallo, 2014-09-15 The development of both elite high performance sport and mass participation grassroots level sport are central concerns for governments and sports governing bodies This important new study is the first to closely examine the challenges and opportunities for sports development in the United States a global sporting giant with a unique market driven sporting landscape Presenting an innovative model of integrated sports development the book explores the inter relationship between elite and mass sport across history drawing on comparative international examples from Australia to the former USSR and Eastern bloc countries At the heart of the book is an in depth empirical study of three traditional and emerging sports in the US tennis soccer and rugby that offer important lessons on the development of elite sport methods for increasing participation and the establishment of new sports in new markets No other book has attempted to model sports development in the United States in such depth before Therefore this should be essential reading for all students researchers administrators or policy makers with an interest in sports development sports management sports policy or comparative international sport studies

High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and

Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-06-12

Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States. Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions. But extracting these offshore petroleum resources involves the possibility, however remote, of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction. The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic. Bolted connections are an integral feature of deep water well operations. High Performance Bolting Technology for Offshore Oil and Natural Gas Operations summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors. It focuses on critical bolting bolts, studs, nuts, and fasteners used on critical connections.

AI 2020: Advances in Artificial Intelligence Marcus Gallagher, Nour Moustafa, Erandi

Lakshika, 2020-11-27 This book constitutes the proceedings of the 33rd Australasian Joint Conference on Artificial Intelligence AI 2020 held in Canberra ACT Australia in November 2020. The 36 full papers presented in this volume were carefully reviewed and selected from 57 submissions. The papers were organized in topical sections named applications, evolutionary computation, fairness and ethics, games and swarms, and machine learning. The conference was held virtually due to the COVID-19 pandemic.

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence-based pedagogies in higher education at something of a level approaching large-scale impact. By offering a communication venue that attracts and enhances much-needed partnerships among practitioners and researchers in pedagogical innovation, we aim to change the conversation and focus on how we work and learn together, i.e., extending the implementation and knowledge of co-design methods. In this first edition of our Research Topic on Active Learning, we highlight two of the three types of publications we wish to promote. First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community. These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research-practitioner partnerships. Second are studies empirically examining the implementations of evidence-based designs in naturalistic settings and under naturalistic conditions. Interestingly, the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in-betweens straddling the two worlds. As a result, these publications represent

both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Florence After the Medici Corey Tazzara, Paula Findlen, Jacob Soll, 2019-10-08 Although there is a rich historiography on Enlightenment Tuscany in Italian as well as French and German the principle Anglophone works are Eric Cochrane s Tradition and Enlightenment in the Tuscan Academies 1961 and his Enlightenment Florence in the Forgotten Centuries 1973 It is high time to revisit the Tuscan Enlightenment This volume brings together an international group of scholars with the

goal of putting to rest the idea that Florence ceased to be interesting after the Renaissance. Indeed, it is partly the explicit dialogue between Renaissance and Enlightenment that makes eighteenth century Tuscany so interesting. This enlightened age looked to the past. It began the Herculean project of collecting, editing, and publishing many of the manuscripts that today form the bedrock of any serious study of Dante, Petrarch, Boccaccio, Machiavelli, Vasari, Galileo, and other Tuscan writers. This was an age of public libraries, projects of cultural restoration, and the emergence of the Uffizi as a public art gallery, complemented by a science museum in Peter Leopold's reign whose relics can still be visited in the Museo Galileo and La Specola.

Successful Coaching Rainer Martens, Robin S. Vealey, 2024. This book is a practical guide to effectively handling the duties and expectations involved in coaching scholastic and club athletes and teams. It details how coaches can develop coaching philosophies, objectives, and leadership styles to become strong decision makers and communicators, as well as how to use discipline and the creation of a culture of character to motivate athletes and support their maturation, cultural uniqueness, mental health, and well-being. It also describes how to be an organized and skillful team manager and teacher, capable of enhancing athletes' skills and knowledge to meet the physical and mental demands of the sport and educating athletes about healthy nutrition and the dangers of drugs and alcohol to enhance their sport-specific performance and general health.

Development of executive function during childhood Yusuke Moriguchi, Philip D. Zelazo, Nicolas Chevalier, 2016-04-01. Executive function refers to the goal-oriented regulation of one's own thoughts, actions, and emotions. Its importance is attested by its contribution to the development of other cognitive skills, e.g., theory of mind, social abilities, e.g., peer interactions, and academic achievement, e.g., mathematics, and by the consequences of deficits in executive function, which are observed in a wide range of developmental disorders such as attention deficit hyperactivity disorder and autism. Over the last decade, there has been growing interest in the development of executive function, and an expanding body of research has shown that executive function develops rapidly during the preschool years, with adult-level performance being achieved during adolescence or later. This recent work, together with experimental research showing the effects of interventions targeting executive function, has yielded important insights into the neurocognitive processes underlying executive function. Given the complexity of the construct of executive function, however, and the multiplicity of underlying processes, there are often inconsistencies in the way that executive function is defined and studied. This inconsistency has hampered communication among researchers from various fields. This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function. Researchers using various methods, including behavioral experiments, neuroimaging, eye tracking, computer simulation, observational methods, and questionnaires, are encouraged to contribute original empirical research. In addition to original empirical articles, theoretical reviews and opinion perspective articles on promising future directions are welcome. We hope that researchers from different areas, such as developmental psychology, educational psychology,

experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented in the Research Topic **Learning to Improve** Anthony S. Bryk, Louis M. Gomez, Alicia Grunow, Paul G. LeMahieu, 2015-03-01 As a field education has largely failed to learn from experience Time after time promising education reforms fall short of their goals and are abandoned as other promising ideas take their place In Learning to Improve the authors argue for a new approach Rather than implementing fast and learning slow they believe educators should adopt a more rigorous approach to improvement that allows the field to learn fast to implement well Using ideas borrowed from improvement science the authors show how a process of disciplined inquiry can be combined with the use of networks to identify adapt and successfully scale up promising interventions in education Organized around six core principles the book shows how networked improvement communities can bring together researchers and practitioners to accelerate learning in key areas of education Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation's schools and colleges
