Transitional Justice and Education Clara Ramírez-Barat, Martina Schulze, 2018-07-16 This volume addresses the role and importance of education for processes of transitional justice In the aftermath of conflict and mass violence education has been one of the tools with which societies have sought to achieve positive transformation While education has the potential to trigger maintain and exacerbate conflict it has also been designed to promote a deeper more nuanced understanding of the past and to advance reconciliation peacebuilding and prevention The original contributions in the book reflect on lessons learned from education policies of the past in post conflict societies and seek innovative sustainable and context sensitive grassroots approaches designed to advocate critical thinking values of inclusion and tolerance and ultimately a culture of peace **Financial Mail**, 2003-06 *Human Resources Development Review 2008* Andre Kraak, Karen Press, 2008

Through 25 chapters authored by some of the leading researchers in the field the Human Resources Development Review 2008 provides an extensive overview of the contextual factors driving human resources development in South Africa A key theme throughout the volume is the importance of a multi faceted skills development strategy operating at three levels The first entails high skills policies aimed at expanding export oriented manufacturing production and services provision particularly in new globally competitive niche areas The second relates to the economy s ongoing need for intermediate skills as is evident in the shortage of skilled artisans and technologists Finally the provision of basic entry level skills is important in view of the urgent need for large scale job creation schemes triggered by public sector initiatives to ameliorate high levels of unemployment and despondency especially amongst the youth **South African Schooling: The Enigma of Inequality** Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of

inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *Promoting effective enforcement of the prohibition against corporal punishment in South African schools* Faranaaz Veriava,2014-06-13 The prohibition against corporal punishment is an integral part of the broader transformation of South African education The prohibition seeks to replace South Africa s violent and authoritarian past with an ethos respectful of human dignity and bodily integrity
