Harvard Business Review ,2003 Current Index to Journals in Education ,1980 Serious Play Michael

Schrage,1999-12-10 Successful innovation demands more than a good strategic plan it requires creative improvisation Much of the serious play that leads to breakthrough innovations is increasingly linked to experiments with models prototypes and simulations As digital technology makes prototyping more cost effective serious play will soon lie at the heart of all innovation strategies influencing how businesses define themselves and their markets Author Michael Schrage is one of today s most widely recognized experts on the relationship between technology and work In Serious Play Schrage argues that the real value in building models comes less from the help they offer with troubleshooting and problem solving than from the insights they reveal about the organization itself Technological models can actually change us improving the way we communicate collaborate learn and innovate With real world examples and engaging anecdotes Schrage shows how companies such as Disney Microsoft Boeing IDEO and DaimlerChrysler use serious play with modeling technologies to facilitate the collaborative interactions that lead to innovation A user s guide included with the book helps readers apply many of the innovation practices profiled throughout A landmark book by one of the most perceptive voices in the field of innovation **Current Index to Journals in Education, Semi-Annual Cumulation, January-June, 1977** Educational

Resources Information Center Staff,1977-09 **Transition Redesigned** Wojciech W. Gasparski,2017-07-28 Transition Redesigned deals with the philosophical bases of different types of transition change in the economy organizational institutional change and change in social and individual relationships The editors primary goal is to give further impetus to a much needed worldwide debate on the issue of transition towards a better future The volume reviews transitions made in different areas of human activity assesses their relevancy and analyzes their contexts During this century different organizations and institutions will undergo a level of radical and global change that has rarely been seen The expected shift must be addressed in terms of a multidimensional transition toward building a sustainable society Do we have an understanding of transition relevant to the task of meeting at least some of the challenges presented in this volume Do we need a radical innovation for redesigning the transition that may enforce real social and ethical responsibilities into organizational practice on different levels and bring to life new ideas Transition Redesigned seeks to answer these questions
