Hillside Teachers College Applications:

To Be a Minority Teacher in a Foreign Culture Mary Gutman, Wurud Jayusi, Michael Beck, Zvi Bekerman, 2023-05-27
This open access book offers in depth knowledge on the challenges and opportunities offered by the inclusion of minority teachers in mainstream educational settings from an international perspective. It aims to be a unique and important contribution for scholars, policy makers and practitioners considering the complexities brought about by global trends into national local educational systems and settings. It will also serve to guide future research policy and practice in this important field of inquiry. The work will contribute answers to questions such as: How do immigrant minority teachers experience their work in mainstream educational settings? How do mainstream shareholders experience the inclusion of immigrant minority teachers in mainstream educational settings? What is the effect of the successful and/or unsuccessful integration of minority teachers and teacher educators into mainstream education settings? Enseignement Supérieur en Afrique Hugh Pilkington, 1986 The SADCC Handbook of Post-secondary Training Institutions, 1992 Educafrica, 1988 *Media and Technology in 21st Century Higher and Tertiary Education in Africa* Costain Tandi, 2023-09-30 This book interrogates media and technology in the 21st century higher and tertiary education in Africa. Using Zimbabwe as its case study, the book highlights the immense changes that the digital revolution has brought to higher institutions of learning in Africa, including changes in teaching and learning. Framed from an anti-colonial perspective, the book argues that digital change, though critical in revolutionising education in Africa, has come with a price as it has resulted in some epistemological erasures and injustices meted against the poor. The book makes a critical contribution as it quests to correct the misdemeanours and injustices caused by digital gaps in African societies. The authors argue that the future and success of digital technology in Africa lie in how well African countries will culturally and contextually sensor technology and attend to the problems caused by digital gaps. The book provides a re-invigorated overview and nuanced analyses of the role of media and technology in revolutionising 21st century higher and tertiary education in Africa. It provides pointers and insights on how African countries can reformulate their education policy in a manner that is in sync with the level of digital technology of the time. This is an important addition to critical debates on media and technology studies in education in Africa. **Research in Chemistry Education** Liliana Mammino, Jan Apotheker, 2021-05-17 This volume emphasizes the role of chemical education for development and in particular for sustainable development in Africa by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach explorations and in-class activities, analyse educational challenges and possible ways of addressing them and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up-to-date compendium for chemistry educators and educational researchers worldwide. **Classroom**
